*dedicated to the true living god*
*BestUR god of All Living Things*

*Prophesied by William Blake*
*Cultivated by Walt Whitman*
*Dreamt by H. P. Lovecraft*

☀ ☀ ☀ **TRUMP** ☀ ☀ ☀

‘A bird never soars too high
‘If it soars with its own wings

❧ Blake

‘It is essential that such a treatise
'Be rid of everything superfluous
‘This is an obstacle to the acquisition of knowledge

‘It should select everything that
'Embraces the subject and brings it to a point

‘It must have great regard at once
'To clearness & conciseness

‘It must aim at the embracing of theorems in general terms
‘For the piece meal division of instruction
‘Into the more partial makes knowledge difficult to grasp

‘In all these ways
‘Euclid’s system of Elements
'Will be found to be superior to the rest

‘Its utility avails towards
'The investigation of the primordial figures

‘Its clearness & organic-perfection
'Are secured by the progression
‘From the more simple, to the more complex

‘By the foundation of the investigation upon common notions

Two objects aimed at in Euclid

First: the whole subject of Geometry
'Concerned with Cosmic Figures, the five regular solids

Second: a means of perfecting the learner’s understanding

‘Every theorem which is completw
'With all its parts perfect
‘Purports to gain in itself all of the following:

‘Enunciation, setting-out, definition, construction, proof, conclusion

❧ Proclus

‘The goal of generalization has become so fashionable
‘That a generation of mathematicians had become
‘Unable to relish beauty in the particular
‘To enjoy the challenge of solving quantitative problems
‘To appreciate the value of technique

‘Abstract Mathematics is inbred and losing touch with reality

‘Concrete mathematics:
'Practice makes it into a disciplined set of tools

‘Techniques have an underlying unity

‘The emphasis is on manipulative techniques
'Rather than on existence theorems

❧❧❧ Knuth Concrete Mathematics

# 1 INTRODUCTION

Mathematics is the path of supreme intellect.
All other pursuits are derivative of mathematical structures.

Once the mathematical-framework - in any pursuit - is conquered
All else kneels in submission.

✦

Mathematician seeks to assess complex situations by reduction
Until only independent & irreducible elements remain.

Relationships amongst these elements then lead to theorems & systems.

✦

Power of mathematics rebuilds a wild-complex
Into a system contained by its fundamental interactions.

Greatest pursuit of the mathematician aims for explicit constructions
Using only its irreducible elements.

Mathematical processing allows lesser-minds to manipulate relationships
Comprised of primordial structures heretofore inaccessible.

✦

Dare take up mantle as *Savior*
Unto multitudes of *stupid*?

‘Mathematicians are more highly trained
'And have a technical facility for thinking

‘That partly comes from practice

'And partly from the **use of notation**
‘For correct & rapid thought

‘Natural science occupied very largely with
‘**Prevention of waste of the labour of thought**

‘Mathematics economizes our mental activity
‘For the **convenient handling** of **long & complicated chains of reasoning**

Jourdain Nature of Mathematics

**Biomes of Calculation**
Mathematics is a forest of trees.

Each tree is a specific-species devoted to a kind of magnitude.

Roots of interconnected-concepts, build webbed foundation amongst various species.
Trunk of theorems central, to the theory of magnitude.
Branches of various growth, extend the reach of the particular domain.
Leaf frontier extremity, state of development & constructive-expression.
Trunk, branch & leaf - all have frontier extremities.

Different kinds of magnitude originate unique branches of Mathematics

‘All magnitudes may be expressed by numbers

‘The foundation of all the Mathematical Sciences
‘Must be laid in a complete treatise on the science of Numbers
‘And in the **accurate examination** of the different **possible methods of calculation**

Euler Elements of Algebra

Foundations are not tended once, and then discarded for fruitful branches.
Best each season hardens a new ring layer of growth around full expanse of trunk.
Extension springs out naturally from a healthy core.

Each concept is developed self-contained within development of the species of magnitude.
Various species cultivate the same concept in their unique perspective.
✦
When a concept arises in a situation
That concept is cloned from various independent vantage points.

Multi-faceted processes instill a rounded-interpretation.

Decades develop each tree into a unique & proud form.
Calculation, as leaves, flaunt unique synthesis between species & creator.

Mind of the mathematician - an ecosystem rich with insight.
Portfolio of constructions - a garden pathway accessible to visitors.

'I know I have the best of time & space
'And was never measured and never will be measured

'I tramp a perpetual journey
'Come listen all!

'My signs are a rainproof coat, good shoes
'And a staff cut from the woods

'No friend of mine takes his ease in my chair

'I have no chair, no church, no philosophy

'I lead no man to a dinner-table, library, exchange

'But each man and each woman of you

'I lead upon a knoll

'My left hand hooking you round the waist
'My right hand pointing to landscapes of continents and the public road

'Not I, not anyone else can travel that road for you

'You must travel it for yourself

Walt Witman Songs of Myself 46

**What is NOT Mathematics**

Mathematics, the science of measure, has existed in a rigorous form, prehistoric unto modern.

It is necessary to attain a correct prejudice of mathematics
Against the species of intellectual-trash produced by universities & publishers
Which form the institution of modern academia.

I have always found that Academics have the vanity
'To speak of themselves as the only wise

'This they do with a confident insolence
'Sprouting from systematic–reasoning

Thus Goldforwifesteinberg boasts that what he writes is njew
'Tho it is only the Contents or Index of already publish'd books

Blake Marriage of Heaven & Hell

Exist three perspectives attributed to mathematics:
{ geometry, numerics, philosophy }

Philosophy is a science entirely non-measurable, and rooted in :
{ universal, particular, existence, non-existence }

These concepts, like literature, encourage reasons & develop frame-of-execution.
Thus entirely preliminary and entirely isolated from the science of measure.

Philosophy evolves into logic once the object attains explicit construction.
Composed only of operators of logic upon logical statements.

*'It was my only wish to* RISE

'Above these jealous, coward, mother-fuckers I despise

2pac

Exist a cycle in every society which hosts mathematics:
Mathematics proves itself as the **pinnacle** of intelligence
Privilege seeks its **honors** via fast-track *Royal Road* of corruption
Academia becomes dominated by privilege THEN mathematics becomes supplanted by **philosophy**
Explicit construction, as proof of intellect, becomes supplanted by **socialite babble**
Mathematics, once encoded *Bourbakian*, allows proof to be **subjective** to the ruling class
Thereby, **gatekeepers** first secure dominion over publishing
Consequentially placement in university & industry.

'Those who can't DO
'expound - uncritically & acquiescently - the orthodoxies

Hammersley

Academia produces generations of thinkers being as snakes eating own tails.
Always full of stomach - no need to seek further - content to sleep & digest fulfilled.

'Weak in courage
'Is strong in cunning

'Oh EW

'Leave counting gold

‘Return to your oil & wine

Only conjecture gold existence
Repent of all child-fuckery

❧ Blake

Philosophy - after World War 2 - supplanted mathematics in academia
Under the guise of ‘Modern Math’, ‘New Math, ‘EW Maths’
To convert the - plain & universal - language of measure
By **distortion** into an esoteric *invasive* priestcraft.

‘Hmmmmm … pork belly?

‘Volks Va Gin!

❧ Hitler 2024

From prehistoric man’s proof of $a^2 + b^2 = c^2$
Mathematics has been the science of explicit calculative proof
Constructive mathematics of Archimedes, Euler & Cantor.

Thus only exist two perspectives of Mathematics:
Geometry: measure by continuous magnitudes.
Numerics: measure by discrete magnitudes.

Philosophy interprets purpose in the universe and builds faith.
Faith in the morrow is essential for reason to exist.
Philosophy may even dream delusions of Cantor's Transfinite fiction.

Logic conjectures existence into an explicit chain of reason.

Mathematics implements general logic propositions atop a species of magnitude.
Proof is established once measure & reason agree into a tested & verifiable procedure.

Mathematic builds logical propositions into a theoretic framework
Calculative methods upon a species - established into standardized techniques.

‘Modern mathematics
'Butt-fucks for children
'But only procures turds

❧ UrWifeMyKid StarCraftII

**Fields of Labor**

To advance frontiers of science is oxymoronic
Mathematics is the process of simplification.

Foundations are used in every situation
Advanced methods can always be circumvented using basic structures.

Cutting edge techniques evolve into simplified relationships as its maturity ages.

✦

Mathematical progression is a process of cyclic hardening of layers.

Linearity, imposed by the structure of books & school, is unnatural to mathematics.

Linear progression of intellect is an academic delusion.
Ability during a situation ranks men of intellect.

✦

Do not enter the zoo of academia.
Baboonish mimicry of memorized formulas.
Chimpanzee pushery of buttoned-calculators.

Institutions of privilege do not nurture intelligence, only submission.
Does the student which excels across total career demonstrate unparalleled boldness or obedience?

‘An Angel came to me and said

‘O pitiable foolish young man!
'O horrible! O dreadful state!

‘Consider the hot burning dungeon
'Thou are preparing for thyself to all eternity
‘To which thou art going in such career

‘I answered
*‘Now we have seen my eternal lot*
*'Shall I shew you yours?*

‘He laughed at my proposal

‘But I **by force** suddenly caught him in my ams
'& flew westerly thro the night

‘Taking in my hand Swedenborg’s volumes
'Sunk from the glorious clime

‘Then leap’d into the void
'Between Saturn & the fixed stars

*‘Here said I! is your lot*
*‘In this space, if space it may be called*

‘Soon we saw the stable and the church
'& I took him to the altar and open’d the Bible

‘And lo! It was a deep pit
'Into which I descended driving the Angel before me

‘Soon we saw seven houses of brick, one we entered

‘In it were a number of monkeys, baboons
'& all of that species chained by the middle
‘Grinning & snatching at one another
'But withheld by the shortness of their chains

‘They sometimes grew numerous

'And then the weak were caught by the strong
‘And with a grinning aspect
'First coupled with & then devoured

‘By plucking off first one limb and then another
'Till the body was left a helpless trunk

‘This after grinning & kissing it with seeming fondness
'They devoured too

‘Here & there I saw one
'Savorily picking the flesh off its own tail

‘As the stench terribly annoyed us both we went into the mill

‘So the Angel said:
‘Thy phantasy has imposed upon me
'& thou oughtest to be ashamed

‘I answered:
*‘We impose on one another*
*‘It is but lost time to converse with you*
*'Whose works are only Analytics*

Blake Marriage of Heaven & Hell

Create a PLAN from foundation to end-game sciences.
{ business, algorithm, theoretic, signals, systems, physics, mechanics, geometry }

Endgame must be nested between approach of fundamentals AND exposure of destination.
Endgame will influence the manner by which foundations are constructed.

Man learns first, then practices second.
Too early to practice disheartens
With wasteful seeking for help in an unfamiliar book.

Better to read until book well known; concepts classified [okay] OR [WTF].
Patient reasoning exceeds the superficial familiarity of practice drills.

Does the plumber explain to his apprentice:
Here is the schematic and glossary of tools.
Now go fix the leak.

Schematic must be navigable, tools must be familiar.
Theory - from approach to goal - suited to situation.
Methods must be clearly structured within theory.
Techniques of methods must be observed from a Master in gapless completion.
Construction of examples well in command.
Many months may pass before problem sets attempted.
✦
Newton the glorious, last of Medieval Wizards.
Boole the scholar schoolteacher, demoted Royal Society to pupil.

Ramanujan the trivial, prophet of Namagiri Thayar.

Isolationists whose fields were books & notebooks.

Trusted treatises populated with conviction of the Master
And marginalia of the Student.

Blank pages filled with contents of the soul.

**Books**

'A good book is like a well-chosen wife
'Sex gets better with each fuck

❧❧❧ Don Quijote

Shelf of beloved companions are always foundational works.

Advanced treatises, by nature, lack depth & wise insight; thus rapidly age-out
They contain the passion & drive of ingenuity of solving real problems
Yet their methods are young and such will one day transform into simpler being.

✦

Adventure to libraries to seek selections.
Seek exposure, and thereby build fluency with the age of publication.

Each mathematic era requires seasons to acquire fluency of its mannerisms.
These tedious wrappers are worth the conquest toward independent perspectives:
{ BC, Archimedes, Galileo, Newton, German, Euler, Cauchy, EWbrew }

✦

Original Works contain the vital motivation of conceptual creation.
This in-depth insight illuminates the origin-need which required a new science.

This final treasure is the endgame scope of scholar.

Carefully blaze from modern textbooks.
Reach century old treatises.
Summit at the ORIGIN in its native sphere.

✦

Nature of academic publishing obfuscates the journey.

Hype of the original causes academic to assimilate & create.
Concepts are scattered in published essays of variated quality.

Hype ends and meta moves on.

Core science is digested over time to distill purity of the nature.

Two products evolve:
Encyclopedic treatment, being scientifically worthless.

Treatises compiled under the synthesis of one scholar.

Completeness of vision of Treatises are scientifically superior to the Original
Yet only the bounty of Original impregnates with true lineage progeny.

Textbooks develop the gap between assumptions of scholar
Unto unfamiliar inability of the noob.

✦

Original books is a clear fact.
Treatises are found by persistent existence in curated-libraries after 100 years.
Textbooks worth affection is a hunt for the rare and obscured beloved - amongst multitudes of whores.

Textbooks often entice yet after a year or two
Falter to be worthy of true commitment.

Remember there are plenty of fish to fuck in the ocean
Shelf as Aquarium, require many beings, which reading will naturally purge in survival of worthy.

‘You mathematicians
'Know how to solve this problem
‘But you cant actually do it

Milne 1950

Each academic-generation regurgitates conceptual roots with each iteration of new textbook.

Previous well-respected treatises are abandoned entirely
In favor of 'novel fusion' which is marketed as latest advancement.

Notation is often the vehicle to create an intentional barrier to the student.
Either choose to learn the modern format OR the historic form.

Publishers know quality is never produced on demand.
Therefore they build false-obsolescence via notational encoding.

Textbooks of institutions have narrow aim and an all-too-general exposition.
Aim is to create a 'Royal Road' illusion of mastery by fancy imitations.
✦
Pearl of Great Price, the original brilliance, gained only by recursion through layers.

Scholar must be fluent in the language of many ages.
Language is the form which brain tissue learns to connect structures.
Each linguistic species trains the brain to form a unique approach
Inaccessible without a decade of every-day-naturalization.
✦
Hunt for textbooks, approach treatises, and tryhard toward original creation.

This progression evolves a unique being
Modern language curated by arts of ancient being.

BLAZE CLEAR that the next mathUR may follow path to forefather.
✦
Newton's intellect spawned a new age of calculation
Which aun Germans followed subservient Lebenitz.

Worthy by devotion to Ancient Greek geometry & mechanics
Which the Germans had long-since frittered away.
✦
Boole toppled Victorian England in the height of its intellectualism.
His revolutionary rebirth of their crown subject: Logic.

His father enabled the study of Ancient Greek at an early age.
At the age of 11, Boole received incredible attention for a Greek composition.
✦
Study the ancients - in their language, alone with no master
Enabled Boole to surpass centuries of institutional growth
Proof of institutional non-requisite existence.

Ancient Greek is a language that foremost places critical expression - Analytics.
Latin is a language that foremost places clear structural classes - Clarity.

’Whatever is capable of increase or diminution is called a magnitude
‘Different kinds of magnitude … is the origin of the different branches of Mathematics
‘Each being employed on a particular kind of magnitude

‘We cannot determine any quantity, except by
‘Considering some other quantity of the same kind as known
‘And pointing out their mutual relation

‘The measure of magnitude of all kinds, is reduced to this:
‘Fix at pleasure upon any one known magnitude of the same species
‘With that which is to be determined
‘Consider it as the unity
‘Then determine the proportion of the proposed magnitude to this known measure

‘From this it appears that all magnitudes may be expressed by numbers
‘The foundation of all the Mathematical Sciences must be laid
‘In a complete treatise on the science of Numbers
‘And in an accurate examination of the different possible methods of calculation

❧ Euler 1765

**Reading**

Axiom of context: statements must exist in the natural biome of the creator's system.

Marginalia transforms reading from passive - to an activity.

✦

Thru-read gives exposure at a pace; exercise muscles to host new habits.
Proper pace is essential to develop discipline, familiarity, and find good books.

After many months of study upon a subject, years in total duration, pace is naturally outgrown.
Yet each season a book should be read at pace to retain habit.

Study evolves to a slow thoughtful meandering
Yet ponderance should only ever remain lowest proportion against action.

Honest development into this phase - is a sign of the first stage of maturity.

Effort a worship of fundamental, over the dash to advanced mechanics.

✦

Thru-read develops a rounded understanding under cohesion of a single author.
Seasons of thru-reads will remove & add books into a favored set of books.

✦

Research seeks topical sections within these mastered books.

Notes culminate an aggregation - seed formation of a personal treatise:
{ toolkit, pictograms, essay, patchwork cutNpaste, monk scroll }

*Techniques establishes theory.*

*Limit of the technique is the bound of the theory.*

✦

Scholar reads in layers.
Each season a new pass on a section.
Years pass before full completion.
Faith cultivates miracles.

✦

**Axiom nature of human authorship**:
Pages are not created equally, nor deserve equal attention.

[0-100] Pages always worked most by the author.
Contains the body of fundamentals.

[101-300] Pages express the intent of the genius of author.
Contains the body of applications.

[301-500] Pages least worked groping of aim of author.
Rarely deserves more than a double read.

Proportion [0-100] : 3 :: [101-300] : 1 :: [301-500] : [.5]

✦

Most new books will not survive the first hundred pages of thorough study.

A clear captivating set of books finds harmony in reading by rotation:

1.A) Book is chosen and its first hundred pages are read.

Foremost principle is to keep a thru-read pace.

1.B) Then that section is immediately reread.
Stop & digest into truncated ponderance - to maintain pace.
Clearly distinguish between sections which are understood
FROM sections which are not-understood.

2.A) Next book is then taken as the daily read.

2.B) Second reading of its first hundred pages
Has a new dynamic of paused-digestion.
Cross reference between other books read, to strengthen understanding of sections
Seek **missing-links** between books helps identify critical junctions within foundation of subject.
Missing-links will be valuable in the creation of your personal treatise.

3.A) Read first book [0-300] Pages thru-read pace.
Books at this stage are very divergent under the interpretative trajectory of the author.
Cross reference between the set of books now becomes a search of what concepts are **similar**.

3.B) Read second book [0-300] Pages thru read pace.
Cross reference notes used to build a personal essay outline.

4.A) Reread first book [0-300] Pages at research-pace.
Write a personal essay of the foundation of the subject.
Keep contents short & concise:
Notes structured into an image.

4.B) Reread second book [0-300] Pages at ponderance-pace.
Ponder if personal essay composed has gaps.
Design a structure methods whose individual techniques are architectural.

5) First decade of scholar life should nurture this essay.
All efforts in devotion to upbringing the foundation of masterpiece treatise Grimore.

'No person Shall be held to Answer
'For a crime unless on a presentment OR indictment
'Of a Grand Jury

'Nor deprived of Life, Liberty, or Property
'Without Due Process of the Law

—

'We the Judges of America

'Dictate that
' **No Due Process** of Law

'IS NOW THE DUE PROCESS OF LAW

Hypocratic States of America

Preface is often the heaviest worked essay of the book.
All well written manifestos should be read often, to frame all that is learned.

An essay is the best form to unify the foundations of several books.
IF one is able to retain a copy of each attempted essay
THEN one is able to have the liberty to demolish & rebuild often.

What remains invariant in cycles of construction will become polished.

✦

Capability of the scholar is proven by the ability to map the subject
Then walk it using your preferred methods.

✦

Foundations benefit from cyclic rereading and contemplative ponder.

Body benefits from assimilation of the foundation into the personal treatise, and applications.
Unlike the foundations, the goal of the body is NOT mastery, but familiarization with implementation.

Implementations of body structures, serve to stress-test the foundations
Load-bearing pillars are distinguished as core to the supportive-trunk
ONLY after the creation is composed complete.

**Notebooks**

Chalk boards are unsuited to grand calculations; each step is valuable and none dare be erased.
To find the root of a miscalculation requires all calculation heretofore to be inspected.

Drafts are precious representations which project development
Garden walkway proof of growth or neglect.

Test-trials are the image of the character of the mind.

Compose the concept from axiom to ultimate in detailed full glory.

✦

Ultimate measure of ability is creation:
{ notebook, treatise, system, analysis, spreads, graph }

Each action sacred as permanent stroke to a specific composition:
{ art book, masterpiece sprawl, exposition series, method abstract }

## *Capture the moment to eternalize the day*

{ marginalia, outlines, iPad portfolio, repository archive }

‘Concrete Mathematics needs a cool head, a large sheet of paper, and decent handwriting

‘Manifesto about our favorite way to do mathematics

‘A tale of mathematical beauty & surprise

‘Math is fun

‘The joys & sorrows of mathematical work are reflected explicitly

‘Capture the flavor of mathematics
'Written by a mathematician with excellent handwriting
‘Set Leonhard Euler’s spirit on every page

‘Concrete mathematics is Eulerian Mathematics

❧❧❧ Knuth Concrete Mathematics

Skeleton Key: transform a book into a cross reference hub.

Select a well-curated encyclopedic book, written terse with overall-scope and with space to annotate.
Evolve this book into a living document.

A Bible to navigate among various sources.
{ masters, methods, summaries, techniques, insights, corrections, inspiration, interpretation }

Bible establishes third-party polarity unto created Grimore
Extremes of understanding- institutional unto personal.

✦

Decade of scholar devotion seeks a singular-aim
Time will be ready for the ultimate synthesis of the all notes & essays
A creation of an original treatise Grimore.

**Scholar**

Mathematics, taught well, can be learned by anyone to a point of true sophistication.

Mathematics, taught terribly, can forge an indomitable mind IF it survives to find The Path.

All who continue this path will become intelligent past imagination.

All intelligent life walked the path of mathematics
Yet few have the will to continue to wisdom.

✦

Highest intellectual-pursuit demands the greatest investment.

Thirty years is the minimum age of a mature mind ready for monk dedication.

Testosterone is required to maintain the arduous masculinity of domination.

'Now there is a reason for grounding the *order of exposition*
'Upon the historical sequence *DISCOVERY*

'That by so doing we are most likely
'To present each new form of truth
'To the mind, precisely at the stage at which
'The *mind is most fitted to receive it*

'Like that of the *Discoverer*
'To go forth to meet it

'Of the many forms of false culture
'**A premature converse with abstractions**
'Is perhaps the most likely to prove fatal
'**To the growth of masculine vigour of intellect**

Boole Differential Equations

Academia is an ordeal accomplished.
Scholar is a hermit way of life.

Wisdom is only attained by the experience of application.
From wisdom follows wizardry.

All who enter are worthy.
To remain worthy is to continue.

'If the fool would persist in his folly
'He would become wise

Blake

Lifelong scope evolves a pursuit into a new species of endeavor.

Upon this journey, you will return to topics, once believed mastered in childhood.
All masters humble to ashes & dirt where once stood temples of religion.

To look upon a concept with honest assessment takes time, but it is a sign of maturity.
Perception of mastery is the constant deceiver and proof of naive delusion.

Progression is no longer defined as a process with beginning nor end.
Progression blooms in seasons of calculation and stabilizes in winters of study.

Life only changes the proportion of perennials upon an ever expanding field.

✦
Obsession must be tamed faithful to the LIFESTYLE, not as the worship of solution.
This unchecked distinction lost Euler his sight despite a king's admonition.
✦
Intellect is grown into wisdom as deduction evolves into induction.

Deduction is the work of sculpting the erroneous portions out of the working set.
Induction is growth via only appending elements pure of error.

‘In discovery, both of this and other sciences
'Had its origin in a practical need

'Since everything which is in the process of becoming
'Progresses from the imperfect to the perfect

Proclus

**Ten continuous years** are to be devoted to the fundamentals.
At a **calculated-average** struggle of 3 hours daily.
✦
Steep an embryo for a decade in order to hatch a dragon.
Physiology of body will be warped by dominance of the mind.
✦
Time alone denominates expertise.
Journey - by unit of time - must be accounted to purge **self-delusion** constant in solitary expeditions.

Marriage of Mind & Math:
First year a battle in which each day is critical to keep love nurtured
Second to third year are only slightly easier
Fifth year math begins to establish a singular enjoyment.
✦
Noob : 1st to 2nd year - Surveyor of the fields of labor
Journeyman : 3rd to 8th year - Acquire the stock of knowledge & familiarity of foundations
Craftsman : 9th to 10th year - Build a portfolio of late-stage sophisticate constructions of the foundation
Expert : 11th to 19th year - The working man worthy of Euclid’s Elements, Peer to the world
Master : 20th year - Peerless wizardry.
✦
There is no Royal Road to expertise.
Ancient Greece declared **ten years** are required by all men in all ages to devote to foundations.

Glory of the man cultivated in a plethora of perspectives.

'The friendly & flowing savage

'Who is he?

'Is he waiting for civilization
'Or past it and mastering it?

'Is he some Southwesterner rais'd out-doors?
'Is he Kanadian?

'Is he from the Missisippi country?
'Iowa, Oregon, California?

'The mountains? prairie-life, bush-life?
'Or sailor from the sea?

'Wherever he goes men & women accept and desire him

'They desire he should like them, touch them
'Speak to them, stay with them

'Behavior as lawless as snowflakes
'Words simple as grass
'Uncomb'd head, laughter, and naivete

'Slow-stepping feet, common features
'Common modes and emanations

'They descend in new forms from the tips of his fingers
'They are wafted with the odor of his body or breath
'They fly out of the glance of his eyes

❧ Walt Witman Songs of Myself 30

Over-work is the ever-present threat
Persistence will teach the solution to harmonious endurance.

Depression is a flag of physical over-exertion.
Paranoia is a flag of mental over-exhaustion.

Change ratio [study : calculate]
Restrict stimulants, always lower dosage to the minimum possible
Invest more effort into food diet for quality and diversity
Drink water frequently
Walk read ponder.

‘The Theory of Functions of a Real Variable
‘Is a body of doctrine resting
‘First upon a **definite conception of the Arithmetic Continuum**
‘Which forms the field of the variable
‘Which includes a **precise arithmetic theory of the nature of a limit**

‘Calculus, consists essentially in the ascertainment of the existence of limits

‘The object to be attained by the Theory of Functions of a Real Variable
‘Consists then largely in the precise formulation of necessary & sufficient conditions
‘For the **validity of the limiting processes of Analysis**

‘A necessary requisite in such formulation is a language
‘Descriptive of particular aggregates of values of the variable
‘This language is provided by the Theory of Sets
‘Which contains an analysis of the **peculiarities of structure & distribution**
‘In the **field of the variable** which such sets of points may possess

—

‘I was led by the difficulties connected with [1] *The Theory of Fourier Series*
‘Through an attempt to understand the literature which deals with them
‘To a study of [2] *The Theories of Real Numbers*
‘Due to Cantor & Dedekind
‘And to that of the [3] *Theory of Sets of Points*
‘A study of the [4] *Foundations of Integral Calculus*
‘And of the general [5] *Theory of Functions of a Real Variable*

‘In the literature of the subject
‘Errors are not infrequent
‘Largely owing to the fact that
‘Spatial intuition affords an inadequate corrective of the theories involved
‘And is indeed in some cases almost misleading

‘The Theory of Fourier Series is exceedingly instructive

Hobson Preface

**Religion**

'Hark Ye Hark Ye!

'That son I put in your wife

'Wuz UR wife gift to you

'A son you can be proud of

'Dont FUCK with his life
'Pay his bills

'ELSE
'Next person I fuck

'WILL BE YOU

UrWifeMyKid StarcraftII

Axiom of Belief:
Religious devotion surpasses secular dependence.

Mathematics is the first primordial religion.
{ belief, faith, lifestyle, worship, gods, prophets, cult, esoteria, sin, heresy }

Mathematics is the only religion which converges towards non-disputable truth.
Supreme proof which seeks to be apparent unto all life.

'Euclid, the marvel is that a book
'Which was not written for schoolboys
'But for **grown men**

'Euclid **once superseded**
'Every teacher would esteem his own work the best
'**All that rigor and exactitude**
'Which have so long excited the admiration of men of science
'Would **be at an end**
'These words would lose all definite meaning

'Until GEOMETRY, in the ancient sense
'Would be **altogether frittered away** as a particular application of Arithmetic

'Euclid's work is one of the noblest monuments of antiquity
'**No mathematician worthy** of the name
'Can afford **not to know Euclid**

Heath preface 1908

Twin gods: Euclid | Euler

Euclid is the god of the Old Testament:
Elements of Continuous Space.

Euler is the god of the New Testament:
Elements of Discrete Space.

'The diversity, the utility, and the beauty of mathematics

'The range, the richness of its ideas, and the multiplicity of its aspects

‘Mathematics a tool, a language, a map, a work of art, and an end in itself

‘Those who are bold enough to tackle the more formidable subjects will gain a special reward

‘There are few gratifications comparable
'To that of keeping up with a demonstration and attaining the proof

‘It is for each man an act of creation
'As if the discovery had never been made before
‘It inculcates lofty habits of mind

J. Newman

**Abacus**

‘Female is suited for mathematics

'Mind & temperance alignT
'Evolved to perfection of Reason

'Yet such species DO naught

~ lazy bitches

'Thus males must dress UP apron

Abacus necklace is the embodiment of mathematic devotion.
Heirloom shrine totem of commitment.
Proof to the wannabe as Polaris.
✦
Four types of beads.
10 beads of each type.
Permanent space-delimiters separate types.
Temporary space-delimiters separate beads within a type; distinguish done from undone.

1 hour beads: Clip spacer.
10 hour beads: Twine tie.
100 hour beads: Copper wire delimiter.
1000 hour beads: Permanent silver ring delimiter installed after achievement.

40 beads complete 11,110 hours.

Then all beads become 1000 hour beads
Each delimited by silver.
Start at 100 hour bead until the 1 hour beads being the final achievement.
30 reused beads complete 41,110 hours, 37 years.

**Mastery** is not a gift bestowed by fortune
Nor a privilege born from elusive talent

It is **measured universally**, unequivocally, by one constant:
**Time**

Dedication is denominated in hours
**Ten thousand hours minimum**, sustained faithfully, day by day
Spanning at **least ten unwavering years**

This daily devotion to incremental progress transcends all other metrics
It is the **sole currency with which true mastery is purchased**

❧❧❧ Malcolm Gladwell Outliers

**Aura**
Vibe of math area critical, whether the location be a dedicated or temporary.

Setup of each session, becomes a spirit calibrating ritual to imbue a space.
Transcend a moment in time, a position in space, as sacred.

Each session - consecrates incrementally - objects involved to produce an aura.

Mind & spirit readied for endurance.
{ desk, light, relics, plants, books, water, kitty, dirt, powder, perfume }
✦
Sensory allurements are key to train habits.
Only indulge in certain vices during sessions.
Mathematics will **dominate vices into servitude**.
To enjoy the pasture of addiction - one MUST enter the realm of mathematics.
{ coffee, snacks, music, incense, ... }

‘My kitty, is precious to me

‘Though I buy it
'With the greatest pain from scratches
–
‘I plan to make this kitty an heirloom of my kingdom
‘And bind my bloodline to this kitty’s fate
‘For I will risk no harm to this kitty
–
‘This kitty is mine
'I tell you
‘My own

‘My precious

‘Yes, MY precious
–
‘With the kitty
'Man would become too powerful

‘He would inevitably become exalted like Sauron himself

‘The kitty makes the kitty-bearer invisible

‘He fades into the realm of shadows
‘Cloaked by the cuteness of the kitty
–
‘Sauron lost his kitty

‘His great eye searches always for his kitty
‘The kitty always seeks to return to his master

‘Sauron will wage war against the world of man
‘He will stop at nothing to find his kitty

‘The kitty must be brought to Mordor
‘The kitty can not be kept here!
–

‘One does not simply walk a kitty into Mordor

‘A kitty can never commit to a single destination

‘The kitty must go to Gondor!

—

‘Gandalf, take the kitty

—

‘DO NOT TEMPT ME!

‘For I would wish to keep the kitty

‘Keep it always inside and never let the kitty return to his master

‘I would wish this to always do the kitty good!

‘No, Frodo, you must take the kitty

—

‘I will take the kitty!

‘I will take the kitty to Mordor

—

‘You will have my cord

—

‘You will have my kibbles

—

‘You will have my nip

—

‘Behold the fellowship of the kitty

Tolkien: Lord Kitty of the Rings

You must have a presence that commands respect.
Tasteful arrangement
Exquisite objects proof capability
Prudent objects proof humility.

Outfit the outward expression of dedication.
Garments being linen, wool & silk
Offer comforts for the long delves into study.

Yards of wool wrapped around the waist, open robe of silk, linen djellaba.

Mathematicians have been wearing such prehistoric.

What may be odd to the modern man
Will set ancient spirits in a settled & rare-familiarity with the present.

’For demonstration has not to do with reasoning from outside
‘But with the reason dwelling in the soul

Aristotle Posterior Analytics

Gold is gaudy and attracts greed.
Silver shines austere.

Wizard Abacus a talisman against ineptitude.
Diamond earrings prove a soul's sparkle.
Jade statuette pendant of high quality of earth.
Wood-bead & copper bracelet blessed by monks.
Ring of significance proclaim Sigil of identity.

Perfume.
Oils & balm in hair.
Lotion on the skin.

Fragrant smoke saturates area with profoundness
    Resin, sage, sandalwood, palo-santo, jericho-rose
    Beeswax candle, incense stick, incense atop ashe.

Vibrations saturate the area with alertness
    Chant, whistle, flute, drum, chimes, jingles.

Mind & Body & Spirit attuned to the environment.
All united for the singular purpose of intellectual perfection.

Cultivate an environment that rises above daily cares.

Keep the space sacred for solitude
    Aun if the only barrier to the world - an air bubble.

Aura is entirely personal and entirely possible within limitations life sets.

Ambience of spiritual resolve.

‘man dese rats took his kitties
‘den dey closed YE bank account

‘kitty hail Hitler
‘kitty hail Hitler

‘all YE kitties nazi now

*‘meow meow*
‘hail Hitler!

*‘meow meow*
‘hail Hitler!

*‘Hiss RAWR*
*‘HISSS RAWrrrRRR*

YEzeus

Workspace consecrated by hours of devotion:
    Mat for the transient
    Massive standing-desk for the fortunate.

Special cups for water, coffee, & tea.
Cute dish of treats to invigorate the mind.

Tower of books.

Vudu amigurumi, the constant companion.
Crystal ball, prove worth of soul to the orb.

Decade of presence establishes a magical bond.

Large paper for a grand calculations
Ink, nibs, pens, markers, straight-edge, compass.

**Ritual**
Begin session - make handsign - encircle yourself with Saltes, sand/dirt/powders.
Start incense, make intro jingle sounds.
Say a concise plea of humility.

This commitment is an external & internal statement.
To summon whispers which direct, question or challenge.

End session - make handsign of parting.
Concise statement of gratitude.
Break the dirt circle - sweep Saltes back into vase.
✦
If life only affords transient space.
Guard stock of Saltes, being more of finely ground powders.
Light sprinkle encircle self.
Prayer of gratitude suffice to end circle.
Exist great strength in exposure of various locations which stimulate the mind.
✦
Fasting builds the mind, body & spirit into a singular resolve.
This buildup is preliminary to the wizard lifestyle.

Work requires energy.
Energy requires food & water.

Hence, potty breaks are encouraged.
Parting handsign, break circle, step out, return, fill in sand with vase, beginning handsign.

All other breaks are a **total violation** and should be observed with a total rebuild of session.
✦
Solitary plunges into the works of the dead
Will summon spirits of the departed
To impart truths upon the modern acolyte.

In order for the spirits to engage there must be no doubt as to the resolve.

Aura a potent cloud calling - ancestral, astral, dead, dreaming - spirits to unite into a cause.

-- Joseph Curwen --

‘Joseph Curwen’s birth was known to be good
‘He had traveled much in very early life
‘And his speech was that of a **learned & cultivated** Englishman

‘Curwen did not care for society
‘There seemed to **lurk in his bearing some cryptic, sardonic arrogance**
‘As if he had come to find all human beings dull
‘Through having **moved among stranger & more potent entities**

‘**Haughty hermit**, ample shelves, which besides the Greek, Latin and English classics
‘Were equipped with a **remarkable battery** of philosophical, mathematical, and scientific works

‘The **titles of the books** in the special library of
‘Thaumaturgical , alchemical, and theological subjects
‘Were alone sufficient to **inspire a lasting loathing**
‘Perhaps, however, the facial expression of the owner
’In exhibiting them contributed to much of the prejudice

‘The bizarre collection, besides a host of standard works
‘Embraced nearly all the cabbalists, demonologists and magicians known to man
‘A treasure-house of lore in the doubtful realms of alchemy & astrology
—
‘He found it was in truth the forbidden Necronomicon of the mad Arab Abdul Alhazred
‘A badly worn copy of Morellos, **bearing many cryptical marginalia and interlineations**
‘In Curwen’s hand, **thick and tremulous** pen-strokes
‘Or the **feverish heaviness** of the strokes which formed the underscoring

-- Charles Dexter Ward --

‘Charles Dexter Ward, his **aberration grew** from a mere eccentricity to a **dark mania**
‘His **madness held no affinity to any sort recorded**
‘Was **conjoined to a mental force** which would have **made him a genius or a leader**
‘**Had it not been twisted into strange & grotesque forms**.

‘Gross mental capacity had actually increased
‘Ward, it is true, was always a scholar and an antiquarian
‘But even in his most brilliant early work did not shew
‘The prodigious grasp & insight displayed during the last examinations
‘So powerful & lucid did the youth’s mind seem
‘**Omnivorous reader & as great a conversationalist**

‘The beginning of Ward’s madness
‘When he suddenly turned from the study of the past
‘To the study of the occult, and refused to qualify for college
‘On the ground that he had **individual researches of much greater importance** to make

‘He abruptly stopped his general antiquarian pursuits
‘And embarked on a **desperate delving into occult subjects both at home & abroad**

‘Look back at Charles Ward’s earlier life
‘When he was larger his famous walks began
‘Alone in dreamy meditation, farther & farther
‘Down that almost perpendicular hill he would venture
‘Each time reaching older & quainter levels of the ancient city
‘After a long look he would grow almost dizzy with a poet’s love

‘At other times, and in later years, he would seek for vivid contrasts

‘Lower eminence of Stamper’s Hill
‘With its jew ghetto & negro quarter clustering round the place

‘These **rambles**, together with the **diligent studies** which accompanied them
‘Certainly account for a large amount of the antiquarian lore
‘And **illustrate the mental soil** which fell, in that fateful winter
’The **seeds that came to such strange & terrible fruition**

‘Spent most of his hours with the curious books and the strange chemicals
‘His labour on the cipher became intense & feverish
‘Charles Ward sat up in his room reading the new-found book & papers
‘And when day came he did not desist
‘The next night he slept in snatches

‘Meanwhile wrestling feverishly with the unravelling cipher manuscript
‘His long walks and other outside interests seemed to cease
‘He frequently asserted his determination never to bother with college
‘He had important special investigations to make
‘Which would provide him with more avenues
‘Toward knowledge and the humanities than any university

‘Naturally, only one who had always been more or less **studious, eccentric and solitary**
‘Could have pursued this course for many days
‘Ward was **constitutionally a scholar and a hermit**

‘Ward began **visiting the libraries again**
‘Witchcraft, magic, occultism and daemonology were what he sought now

‘He **inaugurated a dual policy** of chemical research and record-scanning;
‘Fitting up for the one a laboratory in the unused attic of the house.

‘Charles had had freaks and changes of minor interest before
‘But this growing secrecy and absorption in strange pursuits was unlike even him
‘His old application to school work had all vanished
‘**In his new laboratory** with a **score of obsolete alchemical books**
‘Glued to his volumes of occult lore in his study
‘Ward added to his archive-searching
‘A ghoulish series of rambles about the various ancient cemeteries

‘Charles was thoroughly master of himself
‘And in touch with matters of real importance

‘Contained some **remarkable secrets** of early scientific knowledge
‘For the most part in the cipher
‘**Meaningless except when correlated** with a **body of learning now wholly obsolete**
‘He was seeking to acquire, as fast as possible, those **neglected arts of old**
‘Presentation of the utmost interest to mankind and the world of thought
‘Not even Jewstein, he declared, could more profoundly revolutionize
‘The current conception of things

‘Certain mystic symbols essential to the final solution of his cryptic system

‘After graduation, there ensued for Charles a **three-year period of intensive occult study**
‘He became recognized as an eccentric
‘The needs of his **studies would carry him to many places**

‘**Study & experiment consumed all his time**
‘Visibly aged & hardened, displayed a balance
‘Which no madman could feign continuously for long

‘**Solitude was the one prime essential**, wearing an extremely haggard aspect

---

Ten years of great deeds to arrive at mature wizardry

‘Autumn of 1918 begun his junior year of high school
‘January of 1919 learned of his Curwen ancestry
‘April 1923 to take the European trip
‘May 1926 the return to the ancient arcana of old Providence
‘January 1927, midnight chanting
‘& obscure trembling of the earth & thunderstorm & baying of dogs
‘The stamp of triumph on Charles Ward’s face
‘Crystallized into a very singular expression
‘1928 established in the Pawtucket bungalow
‘April 13 1928 room of Charles Dexter Ward at a private hospital on Conanicut Island

❧ Lovecraft The Case of Charles Dexter Ward

ORAC SCIT ChatGPT 5

# 2 PRELIMINARY

**Mathematic Proof**

'The root of all mischief in the sciences
'Falsely magnifying & admiring the powers of the mind

'We seek not its real helps

❧ Bacon

'Long regretted the neglect of logic, a science
'The study of which would shew many of its **opponents** that the light-esteem
'In which they hold it arises from those **habits of inference**
'Which **thrive best in its absence**

'Logic is the **examination** of that part of Reasoning
'Which depends upon the **manner in which inferences are formed**

'And the investigation of general maxims
'And rules for constructing arguments

'So that the **conclusion may contain no inaccuracy**

'Logic has nothing to do with truths of the facts, opinions, or presumptions
'From which all inferences are derived

'Logic simply takes care that the **inference shall be true**
'**IF** the **premises be true**

'Logical truth **depends upon the structure of the sentence**
'And not on the particular matters spoken of

'Every act of **reasoning** must mainly consist in **comparing together different things**
'Finding out the points in which they resemble or differ
'This is called Inference

'The comparison of several and different things with one and the same thing
'There **must be some propositions already obtained** before any inference can be drawn

'All propositions are either **assertions or denials**

'In all logical reasoning, the negation is simple negation
'Never implying affirmation of the contrary

❧ DeMorgan First Notions of Logic

The irreducible set of elements in a science form the **Axioms of the Science**.

This set of axioms form the bedrock of the system and can NOT be further proven.
The entire framework of the science is built from the relationships of the Axioms.

Axioms are **given** by faith.
All else, technique & theory, must be **directly consequential** from these axioms.

The set of axioms are very influential.

Most mathematical sciences are merely
An **appendage of a single axiom** atop the Arithmetic Axioms.

Set of axioms must be minimal, and entirely formed at the start.

New-Truths appended to the ancient axioms are swept away in time.
All structures built atop, are likewise flushed as tragedy of the imbecile.

Man created in the image of God, destined to devolve into frog-throat-fucking primates.

'We must start from indemonstratable principles
'Otherwise, the steps of demonstration would be endless

Aristotle Posterior Analytics

Proofs are not created equal:
{ truth, closed-statement, open-statement, conjecture }

✦

Truths are **invariant** fundamental relationships
Two elements joined under an operation result in a third element.

Mathematical truths are formed by:
Axioms of Elemental Existence, combined with, Axiom of Operational Effect.

Truths form the primordial structures of a science.

✦

Closed-statements are **complete groups of truths** established into a **conclusive** formula.

Formulas are directly computational AND stepwise-reproducible in computation.

Formulas **may morph** over time, closed-form to closed-form
**Due to emphasis** of perspective - in application of theory or practice.

Closed-statements construct techniques
Techniques construct the structure of a theory.

✦

Open-statements **can not** be proved **conclusive**
**Only assumed** by unending non-contradiction.

Open-statement can be stepwise-reproducible, yet remain non-conclusive.

Due the nature of certain open-statements, many can never attain closure.

Development of open-statements into conclusive-closure
Fully assimilates the open-statement into mathematics.

Open-statements are necessary due to the incompleteness of the science.

✦

Conjecture is a **chain of reason**; it is a product of the science of Logic.

Conjectures use logical-statements combined with logical-operators
To attain a system of coherence given an explicit premise.

Conjectured coherence without explicit, stepwise, numeric construction
Can never enter the science of mathematics.

Conjectures are the drafts of wishful thinking
From which mathematics seeks adventure.

✦

Formula for the square of a number is a **closed-statement**.
$2^2 = (2)(2) = 4$

Shift of perspective transforms the closed-statement to another closed-statement.
$\text{Log}_2(4) = 2$

Results are entirely conclusive.

✦

Count-operation is an example of an **open-statement**:
If iteration can equal N, then the iteration may equal (N+1).

Count operation never-fails in Logic, but fails in application space.

When the count-operation is explicit, then it is closed-form & mathematic.
N = 10; N + 1 = 11

✦

Induction is the science of foundation construction.

Induction **appends-only** proven truths to a system.
There never exists inconsistency in an inductive system.

Foundation is not to experiment or style; but be exclude all impure.

✦

Deduction is the science of analyzing the universe.

Deductive reasoning begins with an imperfect working set of elements & relations:
Logical preprocessing, proven by calculation, filters all which is non-coherent.
Trial & error further removes inconsistent elements & propositions.
Over time, inconsistency converges to zero, and a result is established.

Processes & results are analyzed into a coherent theory.
All must be direct consequences of the foundation built by Induction.

Otherwise, the foundation is incomplete OR the process was inconsistent.

✦

Product of each mathematic investigation is carefully classed:
{ Truth, Closed, Open, Conjecture }

‘There are two kinds of generalizations
'One is cheap and the other is valuable

'It is easy to generalize
'By diluting a little idea with a big terminology

'It is much more difficult
'To prepare a refined and condensed extract
'From several good ingredients

G.Poyla

Distinguish very carefully between the proof of Generalization and the proof of Abstraction.

✦

Generalization is a natural evolution.
Grown from Deductive trial & error in the study of the universe.

Generalization distills invariant relations into a closed-statement proof.
Generalized proofs of deduction never assert more than can be constructed.

For a generalized-proof to exist - there must exist no contradictory case.

✦

Abstraction is evolved from the philosophic ideal of universal-containment.

Abstractionism philosophizes a system of thought built to attain completion under conformity.
This system is conjectured pure & isolated from the universe.

Philosopher forces all analysis of the universe to fit within the ideal system.
The proof is sterile, stripped of all semblance of the universe

✦

Abstraction seeks universal-implementation, a pursuit of the lazy & unimaginative.
Works define the man, and abstractionists avoid calculation at all costs.

‘Definition in itself
'Says nothing as to the existence of the thing defined
‘It only requires to be understood

Aristotle Posterior Analytics

Proof in mathematics must be constructed by operations upon numbers
To **result in a conclusive number**; the process must be **stepwise reproducible**.

Logical-existence-proofs & Logical-contradiction-proofs
Are set at as placeholders for the boundary of mathematic ability
A binding glue preliminary to the weld.

Any theory resting only on logic-proof is immature and underdeveloped
Technique is required to attain the structure of closure.

Mathematics is a forest of trees.
Each tree has growth at every level.
Logic-proofs are the buds which may one day grow into mathematic structure.

‘The question of numerical calculation of the limit
‘One of great practical significance,
‘Is usually in theoretical-considerations of very second-rate importance

‘From a theoretical point-of-view
‘All modes of representation for a real number are precisely equivalent

‘Theoretic representation of a number is the Dedekind section
Insufficient in any practical application

‘The representation of a real number by a **sequence**
‘May be considered as the **most general mode** of representation

Critical in both application & theory

❧ Konrad Knopp p. 79

Calculative-exhaustion distinguishes the mathematician from the **intellectual-poser**.

Mathematic genius seeks the construction of masterpieces
The ultimate expression of superior intellect.

Great expanses of detailed calculations orchestrated
To construct an elaborate proof converging to simple comprehension.

Genius is not easily convinced and requires cyclic affirmation as understanding grows.

The "necessary & sufficient" attitude of minimum effort damns intelligence into **slavish ghettos**.

‘Every theorem which is complete, with all its parts perfect
‘Purports to gain in itself all of the following:
‘Enunciation, setting-out, definition, construction, proof, conclusion

❧ Proclus

## Nature of the Sciences of Mathematics

### ARITHMETIC

Arithmetic is the bedrock foundation of all mathematic science.

Quality in Arithmetic must be a construction which is complete, explicit, finite.
Arithmetic expression requires the totality of the quantity captured by a single element.
Arithmetic must scale stepwise repeatable and decompose stepwise repeatable.
Any failure to satisfy any of these qualities shall disqualify a study from Arithmetic.

**Axiom of Arithmetic**:
Numbers form a inexhaustible sequence subject to global order
Quantity attribute retains order twix any numbers in all situations.

Nature of Arithmetic is to ESTABLISH an immutable foundation
UPON which many other sciences can find eternal construction.

Arithmetic is exactitude without compromise of virtues: simple, pure, direct.

Aim of Arithmetic is to ESTABLISH the continuity property found in the universe
INTO the realm of numbers which is naively discrete.

### ISOLOGIA

Isologia is the science of establishing closed & complete relations
In the form of pointwise equations. (Algebra)

Isologia resides in the Universal Number Space
UNS is not a space and it is not filled with numbers
UNS is a philosophic idea where the elements are symbols of ideas related by ORDER
UNS is weaker than numeric space
Requires qualification to evolve into a number space.

Isologia is the science where relations assert existence.
{ Sqrt(2) or 1/3 }

Objects which **can only be finitely expressed** as **relations** are elements of Isologia.

Axioms of Isologia: equality of statements is absolute.
Isologia is independent from space and spatial-homogenization.

Nature of Isologia uses equality to manipulate statements
To establish a **perspective-driven** chain-of-calculation
Which culminate into a theorem.

Nature of Isologia manipulates within a realm of absolute existence
Continuity of Universal-Number-Space is the basis to conclude
There exists elements of space which satisfies any equation
IF exist a convergent-bounded nest
THEN exist a single number which is the solution

YET proofs confirm this number is impossible to attain.

Isologia is thus entirely incompatible to the quality of Arithmetic.
Universal-Number-Space is a staging ground to establish a Homogenous-Number-Space.

Isologia calculations do not require interpretation of quantity into magnitude.
Elements are not natural to the Universe, but are assumed from operations of the science.

Aim of Isologia is TO establish static identity in directly-conclusive & calculable formulas
FROM complex dynamics observed in the universe.

Isologia seeks to establish identities
To collapse different forms into an umbrella of identities
Or expand forms via manipulation of identities.

Recurrence is a pattern whose sequence elements are built by layers of pervious states.

Capstone skillset is to REDUCE recurrence observed
INTO a simple formula independent of previous states.

Recurrence is a sequence of ordered states

After the initial state
Each state is generated from previous states

The sequence must first be walked
First state, then next state, then subsequent states

To attain the (N)th state
All preceding states must first have been calculated in sequential order

A recurrence is constructible
When a single invariant relation acts
Upon previous states to generate each succeeding state

A recurrence is solved
When the (N)th state can be computed by a closed formula
Without calculating the preceding states

ORAC SCIT

**KRISILOGIA**

Krisilogia, cages the unknown by restricting enclosures of known endpoints.

The conclusive nature of Arithmetic & Isologia
Excludes other techniques that may not be perfect, but are of structural usage.

Krisilogia processes all which is in the process of becoming Mathematics:

rich, diverse, queer

a battleground
a mad science laboratory
where wild things are.

Axioms of Krisilogia:
Known elements may **parameterize enclosures** of non-conclusive space.

Nature of Krisilogia:
Distinguish partitions of space `known-unrelated` or `unknown-related`.
Krisilogia exists inside the domain of Deduction
Stability is relative to wisdom of judicial prudence upon a situation.

Aim of Krisilogia is to establish what is known enough, given a premise
Upon an impossible circumstance.

Lower Bound and Upper Bound approach another without exception
Non-Arithmetic ideas will always exist in zones of uncertainty:
`ARITH_LB < (toOj) < ARITH_UB`

Capstone of Krisilogia:
Enhance the scientific frameworks of known & distinct solutions
With the bond of more general inequality structures.

Explicit weights of what is known and explicit judgements of what is assumed
Assumption often due to proof of non-existence.

Impossible entities when approached by LB|UB enclosures
Produce Arithmetic entities which satisfy tolerance requested.

### ⌬ SYSTAPEIRON

Systapeiron - contraction of the infinite, a boundless inward draw.

Systapeiron builds atop Krisilogia inequalities to form a structural sequence:
Iterate inequalities into a nested structure to be examined overall
Each interval has a unique LB & UB pair
For each interval, create a new entity **Difference-Sequence**
**Difference_i** = `UB_i - LB_i`
Form a sequence of these **Differences**
IF this sequence is monotonic-decremental AND approaches NULL
THEN the nested-inequality-intervals are CONVERGENT.

⌬ Boundless inward spiral of paired extremities, least & greatest
Collapse by iterative-refinement
Which only yields to reason, but never to conclusion.

Convergence, the endless approach, is the fundamental process of the analysis of continuity.

Difference-Sequence is either divergent-unbound or convergent.
Exist two species of convergence, bounds & oscillation.

Divergence is the absence of convergence, being directionally endless in progression.

Convergent-Bound: is the strict approach which never exceeds a refining interval.

Convergent-Oscillation: the indeterminate approach which tends towards a refining interval.

IF space is continuous
THEN in every bounded interval hosts another interior interval
Each nested interval has a unique length which converges to NULL.

Convergent-Bound is an endless approach of a LB & UB towards an intermediary space
Lower Bounds form a sequence
Next LB is always greater than the previous LB but less than all UB.
Upper Bounds form a sequence
Next UB is always less than the previous UB but greater than all LB.

Convergent-Oscillations are endless approaches which do not satisfy the Convergent Bounds
LB|UB nested intervals will violate the structure
Some LB will be less than the previous LB
Some UB will be greater than previous UB.

Convergent-Oscillations form the least structure
Judgement finds that in general there exists convergence
Yet no mathematic technique satisfies the process into a Covergent-Bound.

Axiom of Systapeiron: Space is a dense-continuum
Between any two numbers exists an infinite sequence of numbers
Each greater than the one and less than the other
Partitions of space in a continuum exposes a Hood per endpoint of partition.

To traverse space pointwise is illogical, a point has no space
Space must be traversed by intervals.

In the universe: each step in a journey, any flow of liquid
Is NOT a continuous process atom-by-atom.

Aim of Systapeiron
Use convergent techniques to satisfy tolerance of the situation
Then homogenize suitable LB|UB into the Application Space.

Capstone of Systapeiron is to implement Transcendental Ideas into Arithmetic Space.
Enumerate rates of change AND capture measure of space under decomposition.

Systapeiron is able to inspect local behavior of rate, Derivatives
Local behavior sculpts the global behavior of area, Integral.

'To make us one nation
'As to foreign concerns

'And keep us distinct in domestic ones

'Gives the outline of the proper division of powers
'Between the general and particular Governments

(Being the nation and state governments)

'But, to enable the Federal head to exercise the powers

'Given it, to best advantage
'It should be organized, as the particular ones are
'Into Legislative, Executive, and Judiciary

'By making of the Committee of the States an Executive Committee
'So that Congress itself should meddle ONLY with what should be Legislative

❧❧❧ Jefferson's Complete Works Vol 2 p. 66

**KanoKata**
KanoKata - creation of personal mathematical system
Interpreting the technique & theory of mathematics
Into a unique synthesis of application. (Analysis)

Axiom of KanoKata - each individual master obtains a unique character of understanding.

Nature of KanoKata - from axiom to endgame, all reasoning & judgements
Implemented explicit for another to follow.

Aim of KanoKata - interpretation of science & situation entirely using Arithmetic.
A stepwise guide to how this mind has formed its sophisticate resolution.

Capstone of KanoKata - Each institutional disagreement, here has a definite choice
Another may thereby rank the results in legitimacy
Interpretation in total coherence to the mind of the creator.

**MEASURE**
Measure is the science dedicated to verify sane behavior Arithmetic in Application-Space.
Decomposition of the continuum and the valid propagation of dimension.

Measure is the analysis of Deduplication of doubled-points
And Replication of lost-points
Such always results from processes of boundless subdivision.
⌬
Arithmetic builds ideal processes to operate
Where situation assumed to be free of dedupe/loss under subdivision
This ideal is NEVER valid in the Measure of the universe.

Measure must verify whether those processes survive translation into Application Space
Without loss, duplication, or unstable local collapse.

Integral & derivative theories are not universal guarantees
Only naive assumption of sanity
IF Arith is valid THEN any issue is a product of Measure upon Application Space.

**Axiom of Measure**:
Endpoints of the interval are distinct from internal points, due to the nature of Hoods.
Hoods only become consequential when a point is set as an endpoint.
Exist Lower-Bound-Hood AND Upper-Bound-Hood
Each axis of dimension forms its own pair of Hoods.

Decomposition of space creates two conclusive results:

Minimum-space **required** due to Loss
Maximum-space **possible** due to Duplication.

Nature of Measure is to approach an agreement of minimum & maximum space
Into a conclusive result independent of choice of techniques.

Aim of Measure is to BRIDGE the processes built in Arithmetic Number Space
To its translations in Application Space in a controlled manner
Customized to the characteristics of Application Space.

Measure is an advanced science.
Arithmetic Number Space must be entirely mastered preliminary to Measure.

A point exists ideally-discrete in Arithmetic Space.
A point exists as a continuous Hood of points in the continuum of the Measure of Universe
No point can be isolated from its Hood
Interval is the primordial element of Measure Theory.

Method builds Measure Hoods from Arithmetic Bounds:

Arithmetic is used to assert CLOSED-FIRST-INTERVAL
To produce three mutual-exclusive partitions:
tolerant endpoints, known inclusion, know exclusion.

Measure operates on OPEN-SECOND-INTERVAL
This interval converges to the next nested-interval with techniques of Measure
Measure builds Hoods to begin the next Arithmetic interval.

Arithmetic builds Hoods into a CLOSED-SECOND-INTERVAL.

Now exist two Measure Intervals which are also solid structures of Arithmetic.

Capstone of Measure is to VERIFY, by Lattice-technique, sane behavior of Arithmetic.
TO attain the quality of magnitude in all possible ventures.

‘Texas won the Alamo
'Then kicked Mexico out of Texas

'Arithmetic is the Domain
'Explicit Finite Complete
'All elements homo another

'Algebra is the Domain
'Assume existence established by Relation
'Elements are not numbers but ideas

'Now Algebra can fuck off to the Mexican Desert
'Yall aint Texans no more gosta call yourself
'Mexicans now so people stop getting confused

'Se habla fracciones?

'Not here muffkur
'Here we speak plain spanglish

**dim laboratory lit by sci-fi radiations**

'bURp look at that cube root running over the place

'Rick don't drool on my ipad
'Apple says saliva erodes the screen or something

'pppfff thats bullshit Morty
'Saliva has these things call enzymes that break down stains
'so it helps clean the surface

'yeah but I think THAT is what Apple is saying
'those... is acidic to the screen Rick

'Morty is your Ipad made out of Apples
'Corn Syrup fucking sugar Morty?

'Everything is Sugar MORTY!
'Dentists Morty, they need work, else they will all off themselves Morty
'Then who will pay all their student-loan debt

'Help with this cube or get out of the light

'My nest is repeating an invariant endpoint Rick
'Is that normal for a null sequence?

'Aw geez Morty, you are learning fast
'Math always keeps the high sharp Morty, good thinking LIL friend

'WhhhhaaaaURRRPt is this shit
'You are doing hand calculations like its the 1800s
'classic morty move

'Aw, Rick, I duno, I tried the nest, I did the root thing
'I, uh, kinda did the same calculation wrong
'In the same place like an hour apart
'I totally am a classic morty

'This took me hours and it was all based on a mistake
'Is this what feeling like a real mathematician feels like?

'Ha! welcome to the club, the Morty club, I founded it
'Real math isn't clean. Its messy caz the UUOOHniverse is messy
'But you noticed the anomaly, that is more precious than the answer

'Null sequences factually cant be immutable
'Hours today to learn the Red Flag

'Rules are the worst, who needs em
'But you gotta respect em, until you can prove you can piss on em

'Wow that is nice to say
'Ha whats in the flask

'I am gonna tell mom to buy you more for My birthday

'I love you too Morty
'Up at 3am cursing at cube functions in a null sequence
'Thats the shadow of a master, trUUUUUURP devotion

'Stare at your errors till they blink first
'Walk the steps, each one, with bare feet

'Well thats why I am using nests Rick
'But ummm uh sometimes, most times, you just
'Throw numbers outta nowhere!

'Like that time today you said
~Ah thats easy its 10 to the .6 power
'And I was like where did you even get that from

'Trade secret, Morty, I've got a black hole full of precomputed logs
'You are building all digit by digit, ReUUUGHspectTTURP

'Besides you called me out
'When I uhhh faked I knew that ummm Knopp decimal log convergence

'Thats what makes this the best partnership in the multiverse
'When I drop a number like a shit, you check my math and call me out

'Aw geez Rick
'We do digest everything together

'Like a warren of rabbits eating communal turds

'So what's next
'Binomial expansions, Sine fitting?
'Or we just, y'know, stare at our mistakes
'Until they turn into, uh, integral equations or something?

'All of the above, Morty
'Its only 4am and school just begun
'We got those crUUUURystals
'I knew we needed them

'Can you ... help me with my math ... homework
'I can't seem to get a grip on Trigonometry
'And Jessica asked for help in class
'The Sine summation of angles

'Hold up there little buddy
'You are here doing Cantorian Nests of epsilon null sequences

'You can't pass your math class
'Caz you can't memorize trig relations?

'School is for stupid people

'Why UUUR? why you think smart people need teachers Morty?!

'Those Trig Idents, they are justified by convoluted approximations
'You walk them bare foot, you will never arrive at identity

'its all a lie

Why would math lie to us?

'Because the real calculations are messy and dont fit neatly
'Apply calculations into a physical cyclic system

'RRRRaaaahhheeehhQQQurpTTT

'Ever throw boots in a washing machine Morty?

'School doesn't teach math
'It tests for memorization

'You been at a single equation, how long?
'All night!

'Class is what like an hour
'Do the MATH dumbass

'That isn't enough time to do anything but dance
'Dance like a good mommas boy bitch monkey

'So lets do Sine angle summations
'Taylor Expansions 1600s style

'Morty, the result wont match the 'answer-sheet'
'You won't even finish the first step of the first problem
'But it will be the classic morty move

— Rick & Morty

# 3 ARITHMETIC SPACE

**Arithmetic Space: Axioms**

‘A **point** is that which **has no part**

‘A line is breadthless length
‘Extremities of a line are points

‘A straight line is a line which lies evenly with the points on itself

‘A surface is that which has length & breadth only
‘The extremities of a surface are lines

‘A plane angle is the *inclination to one another of two lines* in a plane
‘Which meet one another and do not lie on a straight line

Euler’s Axioms of Geometry

Euclid's Axiom of a Point: a point has no space.
Thus a point is sub-elemental in continuous space.

✦

Euclid’s Axiom of a Line: a line is breadthless length, the extremities of a line are points.

Thus a line, bound by endpoints, is the element to measure Continuous Space.

‘The determination, or the measure of magnitude of all kinds
‘Is reduced to this:

‘**FIX** at pleasure upon any **ONE** known magnitude of the **SAME SPECIES**
‘With that which is to be determined
‘And consider it as the measure or UNIT

‘Then, determine the proportion of the proposed magnitude to this known measure
‘This proportion is always expressed by a number

‘So that a *NUMBER* is nothing but
‘The proportion of one magnitude to another arbitrarily assumed as the unit

Euler’s Elements of Algebra

Euler’s Axiom of Discrete Space:
First, magnitude only exists between same species - HOMOGENITY.
Second, number is the proportion of one magnitude to an invariant denominator - ORDER.

✦

Unit is the denomination, being the calibration of measure.

A straight edge ruler measures by the scale of the unit NOT by the whole, 1/1.
Whole unit, and unit of measure - are therefore distinguished.

Unit of measurement is the fixed constant denominator.

⌬

Denomination = law of atomic scale, being the measure.
Unit-step = one complete interval. [0/10, 10/10]. Determines admission of elements.
Whole = complete object under denomination. 10/10.

✦

Elements of a space need be entirely alike with one explicit exception: magnitude
— which distinguishes the character sought.

Ratio is an unresolved operation of an element the denominator unto an element the numerator.

Function is a formulation of ordered-operations upon elements of a number space
A construction entirely within homogenous space.

Elements of Arithmetic Space are magnitudes bound by numbers/points:
Homogeneous within domain
Uniquely explicit in order
**Finitely expressed in totality**.

✦

Syntax notation is not sufficient to obtain mathematical character.

Property of Homogenity is a property of the space — not of operation.
Order and operation can only exists after Homogenity is established.

Thus a function must FOREMOST be homogenous to the space — to be Arithmetically coherent.

'lets homo dis faggit

~~~ EUchi twitch.tv

{ 1/x } Is a non-arithmetic function, this syntax generates non-coherence.
Its nature has always been contradictory in mathematics:
a non-linear yet linear function, curve of the first dimension.

{ 1/x } Violates the first property of Arithmetic Space: Homogenity

Each variation of { 1/x } produces a number which exists
In a space entirely isolated from all other terms.

A magnitude in space requires two points in the same space
To establish a line - the element of space.

{ 1/x } syntax generates unique spaces
Not elements of a space where operations can exist.

✦

A line is the element of Continuous Space Theory. CunT
Unit scale is the element of Discrete Space Theory. DikT

✦

Elements of Arithmetic Space need retain the property of ORDER & OPERATION **IMMEDIATELY ATOMIC.**

Exist strict order between all elements in the number space
A < B **XOR** A > B **XOR** A = B

~~~ EUdoxUS

**Arithmetic Space: Magnitude**

Magnitude is ethereal unless grounded in intelligent spacial understanding.
Spacial understanding only gains bearing from experiences.

Decimal number space is the magnitude of human perception.
De'Morgan gave root to the decimal system: 2 (hands) 5(fingers) = 10 units.

✦

100 kilometers is far.
10 kilometers is across the region.
1 kilometer is distant.
1 meter is at hand.
1 centimeter is vision-perceptible.
1 millimeter is touch-perceptible.
1 micrometer is lens-perceptible.
1 nanometer is electronically-perceptible.

Magnitude requires its species of space to be familiar
In order that intimate & general relations be understood.

✦

Base 10 is the number system which has been cultivated lifelong.
From personal experience to information learned in various sciences.

Spatial intuition, which rests upon mathematic intelligence
Is most fertile in Base 10.

✦

Sophistication demands more than EUdoxUS relation.

The extent, the force, the scale, the effect
Of the magnitude empowers results with meaning within a context.

Thus intelligent constructions can ONLY be built
From a space which affords ready intuition unto BOTH creator & observer.

Intuition concentrates a more accurate focus on more critical generalizations
Rather than upon translation between spaces of understanding.

⌬

Homogenity is required for calculation.
Homogenity is not sufficient for comprehension.
Application of magnitudes to physical space increments comprehension.
Comprehension is preliminary to judgement.

✦

Command comes from domination of the Species of Space.
Fine adjustments to grand generalization.
Distance throughly mastered.

**Arithmetic Space: Cock Species**

‘Which **Crayon** did your mommy
‘Use to color your skin?

~~~ EUchi twitch.tv

Any Arithmetic Space is a specific type of Species.
Each Species has a unique character which influences the nature of Arithmetic.

Methods, then techniques, and lastly theory -> are dependent upon the choice of Species.
The study determines the Species suited for the investigation.

Arithmetic is based upon the Treatise of the Theory of Algebra
— Developed by George Peacock D.D. F.R.S. F.G.S. F.R.A.S 1842 Edition

✦

Each Species is determined by its Basis.
Basis is structured by Denomination.
Denomination may be Prime or Composite.

✦

Basis identifies the Arithmetic Character which elements are intended to represent.
Binary to represent existence & non-existence.
Decimal to represent human calculable exactitude.
Sexagesimal to represent angles upon a plane.
Radian to represent cycles.

Basis is not a choice of notational representation.
Basis is the selection of a field of Arithmetic Space.

Singulars build equivalence relations.
Binary constructs computational algorithms.
Decimals express human readable calculations.

Character of the space is fundamental to the science.

Binary Algebra is drastically different from Decimal Algebra
All are alien to Abstract Algebra.

Medium of the space influences the theory and ultimately
The field of exact results.

GOD HATES FAGGIT FRACTIONS
*smear EM queers*
~~~ Jew Christian Bible

Basis determines Arithmetic behavior under operation.
Basis is the primitive quality of species, which hold for all members.

Coherence is not proven by the individual member
But by the coherence of all members.

Incoherence proven by the individual member
Exhibits ALWAYS the character of the Species
Never the isolated character of the individual member.

✦

Denomination structures the space of elements, order, and operations.

Denomination may be a pure Prime Field or a Composite Field.

Denomination remains coherent when stacked by powers
In order to approach refinement of measure:
{ 1, 10, 100, 1000, 10000, 100000, ... }
{ 1/10, 1/100, 1/1000, 1/10000, ... }

✦

Prime Fields are the pure form in which elements are completely bound to the nature of the Basis.
Operation & its decomposition remain immediately atomic.

Character of space & operation are in its pure direct form in Prime Fields.

✦

Composite Fields are constructed from two or more Prime Fields, to build a more general space.

Exact relations between elements are preserved
But the characteristic natural-identity within a space is smeared.

Decomposition of elements into Prime Fields
Becomes a non-atomic process, introducing asymmetry.

Composite Fields are unable to collapse backwards to identity of its Prime Fields
Hence exist proof of inequality between Prime Fields and Composite Fields.

✦

Decimal is a composite field in which its two primes: 2 & 5
Both are symbolically immediate for humans to atomically decompose.

Last digit if 2-steps is decomposed by 2.
Last digit if 5-steps is decomposed by 5.

✦

Non-Finite-Fracture is the inability of a Species to represent a number/point finitely.

The essence of a Non-Finite-Fracture
Establishes the unique character of each Species of space.

Species are distinguished by the ratios which are incapable of finite representation.
Non-Finite-Fracture is a property of a specific Prime Field.

✦

Species of the space upon which a study exists
MUST exist on the minimum set of Prime Fields.

Each composition distorts the nature of Space
Morphs all previous elements
Increases loss of information required in decomposition.

✦

Time, weight, speed and such are not Arithmetic Species.
Each are species in some other science.

'I gladly avail myself of the opportunity of inscribing to you
'For a second time, a work of mine on Algebra
'As a **sincere tribute of my respect, affection and gratitude**

'I continue to devote some portion of the leisure at my command

‘To the completion of an extensive Treatise
‘Embracing the more important departments of Analysis
‘The execution of which I have long contemplated

‘I have separated arithmetical from symbolic-algebra
‘I have devoted the present volume entirely
To the exposition of the principles of arithmetical processes
‘And their application to the theory of numbers

‘I have given a general exposition of my reasons
‘For distinguishing arithmetical from symbolical-algebra
‘And of my views of the JUST relations
‘Which their principles bear to each other

‘A more *MATURED CONSIDERATION OF THE SUBJECT*
‘Convinced me of the expediency of this separation

‘For it is extremely difficult
‘When the two sciences are treated simultaneously
‘To keep their principles
‘And results apart from each other

‘To obviate the **confusion**, **obscurity**, and **false-reasoning** which thence arises

‘A short statement of the distinct and proper provinces of these two sciences
‘Arithmetic & Algebra, will make THIS DIFFICULTY sufficiently manifest

‘In Arithmetical Algebra we consider
‘Numbers and the operations in their ordinary meaning only
‘We must suppose the numbers to **be quantities of the same kind**

HOMOGENITY & SUBTRACTION
When a first number is reduced by a second number
We must suppose the first number be greater than the second number
‘Therefore homogeneous with it

HOMOGENITY & DENOMINATION
‘In products and quotients
‘We MUST suppose the **multiplier and divisor to be abstract numbers**:
‘All results whatsoever, including negative quantities
‘which are not **STRICTLY DEDUCIBLE as legitimate conclusions**
‘From the definitions of the several operations
‘**MUST BE REJECTED AS IMPOSSIBLE**

‘Numerical fractions which **have NOT a common denominator**, are **NOT HOMOGENOUS**
‘And are incapable of addition and subtraction

‘The multiplication and division
‘Of a number or a fraction
‘By a fraction
Is ONLY admissible in Algebra
‘In virtue of a convention
‘Which *assumes* the **PERMANENCE OF FORMS**
‘Which constitutes the great and fundamental principle of Symbolical Algebra

‘By THUS TRENCHING upon the province
‘Of another and more comprehensive science
‘We are **enabled to give an extension** to **our notion of number**
‘Which greatly enlarges the province of arithmetic and arithmetical-algebra

‘Generalizations of Arithmetical Algebra
‘Are *generalizations of reasoning*, and **not of form**

‘We conclude
‘Generally that ALL the necessary results of Arithmetical Algebra
‘Must be **RIGOROUSLY RESTRICTED** to those conditions
‘Of value and representations which the **definitions require**

‘A student who is not only familiar with the results of Arithmetical Algebra
‘But likewise with the limitations which it imposes
‘Will be in a condition to comprehend and appreciate
‘The whole extent of the *LEGITIMATE CONCLUSIONS* which it furnishes

‘And though he may find HIMSELF
‘Perpetually brought in contact as it were
‘By the generality of the form of the symbols which he employs
‘And of the rules of the operations to which they are submitted
‘With RESULTS, **which definitions of Arithmetical Algebra**
‘**WILL NOT AUTHORIZE**
‘Yet he will thus acquire a habit of observing
‘Not merely what is within, but what is without
‘The *JUST AND PROPER BOUNDARIES OF THE SCIENCE*:
‘And what is more important
‘As a preparation for the study of Symbolical Algebra
‘He will be thus enabled to appreciate at once
‘The origin and full extent of the
‘**Principle of the Permanence of Equivalent Forms**
‘Which assumes a knowledge
‘Of the rules of Arithmetical as the basis of those of Symbolical Algebra
‘Without which the identity of the results of the two sciences
‘As far as they proceed in common
‘**Could NOT be secure**

‘The present volume
‘Though strictly elementary as far as the theory and operations are concerned
‘Will be found to comprehend many other subjects
‘Which cannot be considered as equally necessary as introductory
‘To the study of Symbolical Algebra

George Peacock  A Treatise on Algebra

Same Species is proven by order remaining immediate:
5 > 3  1/2 < 3/2  40-deg > 11-deg  1001 < 1101

Order is not immediate: 1/3 , 2/5.

A third common space, Composite Space, can always be found to measure two elements of different species.

Arithmetic does not compare 1/3 to 2/5.

Arithmetic takes both mutually non-comeasurable species
Into a third Composite space capable to represent both species
Lastly, homonogizes each into the new Composite Space.

1/3 : 2/5 :: 5/15 : 6/15

To homogenize:
both denominations (3, 5) are forsaken for a third denomination (15).

✦

A Composite Space is **logically possible** for a general finite series
But such process produces a space **mathematically incoherent**.

The nature of the space morphs with each new aggregated Prime Field.

A Composite Space which is not reduced to its minimum set of factors
Will become entirely abstracted from resolution into an Arithmetic Space.

✦

Dimensions of complex systems may build intricate Composite Spaces
All less-than or equal-to the highest Composite Space

A reduced system justifies its complexity, as each is a type restricted by the global domain.

✦

To build one entity, NOT A SYSTEM, into high-complexity is **non-sensical**.

$$\frac{3{,}579{,}110{,}201}{1{,}322{,}341{,}345} \tilde{=} 2.7$$

To say these two ideas are approximately equal is BLASPHEMY.
The denomination past a billion is *apostate* from reason.

Composite Space of 1_322_341_345
{ 5, 13, 17, 73 , 97 }

This example calculated from the integral of 1/(1+x^2)

✦

Geometry was built to worship the Individual.
Arithmetic was built to worship the System.

Space begats the magnitude NOT magnitude begats a space.

✦

The space of 1,322,341,347 is currently a very lonely place.

The Composite Field {5, 13, 17, 73 , 97 } no doubt has a unique character
Who would dare to invest in long-term relation requisite for spatial comprehension?

Damnable, whoever build such a field without spacial command
Foolish to build a field for the sake of articulating a member in a language no one knows
Then after such grandeur declare it be approximately 2.7 — BLASPHEMUR.

✦

Same Species is obtained by the operation homogenization
Into a composite-factor field being composed of prime fields.

This is a third species, the mutual denomination.

Each prime field has a character of Non-Finite-Fractures
Native to its space being its distinguishing property:
Prime Species' character of Non-Finite-Fractures
Are overlaid by the ability of other primes to represent SUCH VALUE finitely.

Base-2: .1 is a Non-Finite-Fracture
Base-5: .1 is finite
Composite-10: .1 is finite via Base-5.
✦

*Arithmetic is the science of exact finiteness.*

Each species of magnitude has an immutable character of finiteness.

Thus each change in denomination, Composite Space
Reduces the Non-Finite-Fractures
At the cost of losing connection to the nature of the origin Species.
✦
Non-Finite-Fracture is always pointwise within a Prime Space.
A point has no space, and if the space may be considered continuous
Then there exists no space of Non-Finite-Fracture

Continuity conjectures there always exists a member of Prime Space
Approximate & within the species to obtain no loss of space.

YET the requirement of approximate homogenization
Qualifies the situation as being Non-Arithmetic **Systapeiron**.
✦
Non-Finite-Fractures explode in seriousness with each appended dimension.
Fracture of a line is a point.
Fracture of a surface is a line.
Fracture of a volume is a surface.

**Arithmetic Traversal**

Arithmetic Space is traversed by operations.
Coherent operations must retain traversal to that specific denomination.

Operations are axiomatic in the general science.
Methods of operations & the resulting theory ➡ are unique to the Species of Space.

COHERENT OPERATIONS
(a + b) Addition — to increment a number by another number.
(a — b) Subtraction — is to decrement a greater number by a lesser number.

NON-COHERENT OPERATIONS
(a / b) Homo-Division — to decompose a quantity with **steps** of a different denomination.
(√a) Roots — to decompose a quantity with **structured-steps** of a different denomination.

NOTATIONAL STRUCTURES OF OPERATIONS
(SUM [LB,UB] {STEP}) Series - sequence of operations.
(SUM [1,5] {3}) = (3+3+3+3+3) = 15
(SUM [1,5] {1}) = (1+2+3+4+5) = 15
(a * b) Multiplication — to scale a magnitude by an abstract number.
5*2 = (2) + (2) + (2) + (2) + (2) = 10
(a / b) Division which retains denomination is a structured-subtraction.
(a^n) Powers — to expound magnitude by **nested-addition**.

✦

Homo-Division & Roots are operations which expose
Non-Finite-Fracture of an Arithmetic Species.
Each operation result must be qualified prior admission to the Arithmetic Space **NON-ATOMIC.**

'We MUST suppose the **multiplier and divisor to be abstract numbers**

**'The multiplication and division**
**'Of a number or a fraction**
**'By a fraction**
**Is only admissible in Symbolic Algebra**

❧❧❧ Peacock

Peacock's position on fractions takes many years to ponder.
A denomination must remain unaffected by the multiplication or division by involving fractions.
Scaling by an abstract number may only affect the numerator.

Multiplication of two fractions, is acceptable if it retains homogenity
Denominator must be powers of the same Species.

3/10 * 4/10 = 12/100 Arithmetic members Lattice 10^1 result in the Lattice 10^2

(1/3)*(4/10) Non-Arithmetic operation of noncomeasurable Species

(1/3)*4 (1/3) is treated as an Abstract Scalar to the quantity 4, the numerator
YET the result is non-finite non-homogenous to Decimal Species.

Thus the operation of Homo-Division must result in a finite element of the Species of Space
Else the operation is Non-Arithmetic.

Thus the operation of multiplication of two fractions is NEVER traversal of Space
Ever the result is a member of a different Denomination.

Fractions are NOT elements of Arithmetic Space
Operation upon fractions DO NOT traverse Space.

The operation of Homogenization is based upon Division
Operation invoked in an isolated Space local only to the operation
IF the operation concludes finitely
THEN mathematician may decide upon Composition of Space
ELSE result is Non-Arithmetic & demands **Systapeiron** to be homogenous.

✦

(1/3)*4
Abstractly scales 4 into a non-comeasurable 1.3333333 ...
Study determines the resolution of Denomination, example: (1/10^3).

(4/3) under denomination (1/10^3) is 1.333 ➡ truncated-noncomeasurable in Decimal Space.

(4/3) must be effected in a isolate space in Universal Number Space = 1.3333333 ...
Denomination of (1/10^3) truncates the non-comeasurable to 1.333.
Truncation is a judicial choice within Systapeiron
It is one of many possible methods of Approach to a given Space.

Systapeiron processes return to the Arithmetic Space a homogenized element 1333/1000.
Thus all Systapeiron processes can only be effected after the final denomination refinement
ELSE if the next refinement demands (1/10^4)
Then 1333/1000 has non-immediate existence in base (1/10^4)
Choices: { 13330/10000, 13333/10000, 13334/10000, ... }

Systapeiron processes only homologize to a specific denomination space.
Homonogized elements are different than elements of Arithmetic Space
Arithmetic elements are transformed into the next refinement immediately.

Arithmetic elements are traversed by operations
Homonogized elements are assigned by the mathematician
Algorihymns may be coded to attain automatic transforms by iteration of homos.

✦

If Systapeiron is required by the study
The final Arithmetic Lattice must be first attained
Then elements of Systapeiron attain coherence
If a refinement is later required
Then this coherence is entirely invalid
Systapeiron rebuilds its layer anew.

Arithmetic elements of the Lattice are kept isolated
From the layer of elements of homogeneous approximation.

✦

An abstract operation of scaling has three fates:
— preserve basis species
— a finite representation requires composite field

— non-commeasurable mutation into a homogenized approximation.

Composition of Fields is a consideration of Spaces
Not of individual operations.

Many mathematic ideas coerce a construction
Which **do not settle** upon any specific Composite Space to handle all elements of the study
This is proof of Non-Arithmetic Nature.

Mathematician must clone the Non-Arithmetic study
From within natural borders of an Arithmetic Species.

✦

Purpose and reason can never be divorced from computation.
Here is the superiority of the Man above the calculator.

Arithmetic perfection must always remain independent of masculine labors.

**Council in MeowiDell**

'Sauron's spies are everywhere

'Just drop the kitty off at an orc outpost
'And let us be done with it

—

'No Gimli son of Gloin
'All know the structure of His domain

'Who holds the kitty
'Holds dominion over all life
'By affection for the kitty

'Usurpers will rise
'Take their gamble toward ascension
'As the new Kitty Lord

'Who isnt a usurper
'Will give in to greed

'All know His reward and desire it

—

'So let em EW kind
'All kill each other

'Wise Agent Smith

~ no froth off my whiskers

—

>EHh ERMm<

'And risk harm to the kitty?!

'This precious noble feline
'Would not without torture
'Remain captive under so FEL a nose!

'Would any of you
'Condemn this kitty
'Aun an hour

'For the sake of ones own safety
—
Some in the council evilly calculated

Being simple-minded dull-witted dog-lovers
Immediate resolution was past their faculty
—
Gandalf stood
Towering above all

'Sauron knows it was Man & Agent Smith
'Who took the kitty and did not return it

'Any harm which befalls the kitty
'Will utterly destroy our realms

'The kitty must be returned
'Whole happy & full of meows

**Arithmetic Space: Operation**

Addition-Identity:
Total balance alone establishes coherence.

**Anything** can be added IF that same amount is reduced.

0 = B – B
A + B – B = A

✦

Add-Inverse:
IF an amount is ADDED
THEN that amount may be SUBTRACTED without regard to Greater & Lesser appropriation.

K = (D+D+D)  A + K – D = A + D + D

✦

Addition property of Permutation: chaining of addition is independent of order.

A + B + C = C + A + B = B + C + A

✦

Addition property of Association: grouping is notational convenience.

(A + B) + C = A + (B + C)

✦

Structures do not change the rules of its foundational operation.

✦

Multiplication property of Permutation: chaining of multiplication is independent of order.

ABC = ACB = BAC = BCA = CAB = CBA

✦

Multiplication property of Association: grouping is notational convenience.

A(BC) = (AB)C = B(AC)

✦

Multiplication property of Distribution is a compound operation.
This the first complex structure of Arithmetic:

A(B + C) = AB + AC
(A + B + C)(D + E + F) = AD + AE + AF + BD + BE + BF + CD + CE + CF

Mathematician does not start from nested-addition.

First exists irreducible elements NOT structures.

(2) + (2) + (2)  + (4) + (4) + (4) +
(2) + (2) + (2) + (2) + (2) +  (4) + (4) + (4) + (4) + (4) +
(2) + (2) + (2) + (2) + (2) + (2) + (2) +  (4) + (4) + (4) + (4) + (4) + + (4) + (4)

First layer nest is built
(3 * 2) + (3 * 4) + (5 * 2) + (5 * 4) + (7 * 2) + (7 * 4)

Second layer nest is built
(3 + 5 + 7)(2 + 4)

✦

All numbers are implicitly denominated by the unit value.
Denomination can never be removed by cancellation in Arithmetic Space.

Denomination is a symbol which may seem equivalent-symbolically to a quantity
YET Denomination is entirely distinct from quantity.

Unit denomination: **B**, may be explicit or implicit.

A(B) = A(B/**B**)

A(B)(B) = A($B^2$)/**B**

✦

Functions are formulations of ordered-operations

Functions **must** remain within a specific denomination thru limitless traverse.

IF a function finds operations of elements non-comeasurable to the denomination

THEN the entire function is non-arithmetic.

Functions declarations are open-statements in Arithmetic.

**Arithmetic Space: Operation Chain**

Chains are magnitudes connected by an operation.

Ideals are complex ideas approached by constructions of simple forms.
Chains of operations build refinement of the approach towards the ideal:
{ lines, rectangles }

✦

Within-denomination of a specific Arithmetic Space
Addition & subtraction operations are boundlessly naive.

Yet, remaining within the denomination is a non-trivial dedication.

Unlimited stability is purchased
At the cost of effort due uncompromised-restriction.

✦

Decimal Space violations:

| | |
|---|---|
| (1/100) + (1/10) | (1/10) belongs to a different iteration of the Lattice |
| (2/3)5 | (10/3) is non-comeasurable with the Lattice |
| 2 - 4 | (-2) requires a negative system to be established on the Lattice. |

✦

Once an Arithmetic Space is chosen and **numbers are restricted to that field**
Operation chains will all be atomic & coherent.

The cost is that the Basis will not easily approach the desired ideal.

To build a specific simple object in one space
May demand extreme labor in a different space.

Ingenuity is demanded to conform to the situation
Which permits no form of universal application.

✦

The Universal Number Space carelessly assumes all numbers comeasurable
UNS is abstracted from the grounding concepts of space homogenity.

Imagination, being the root of assumption, allows frictionless fictional ease
In the approach towards an ideal
By means of more impossible ideals.

UNS lacks the integrity to support chains of operations
Each appendage of operational element is a growing feat
Exist no quality reached only compounded-truncation to short-circuit computation.

UNS requires a verification of the whole construction
At each step to check the bounds of the construction.

Examples of chains of operations which build with non-comeasurables:
{ triangles, trapezoids, sine }

‘*THOSE* who would trade our FREEDOM
‘For the *Soup Kitchen of the Welfare State*
‘Have told us *THEY* have
‘A Utopian Solution of Peace *without victory*

‘*THEY* call for the policy ACCOMMODATION
‘*THEY* say if we only AVOID any direct confrontation
‘With the enemy, he will forget his evil ways
‘And learn to love US
‘All who oppose *THEM* are warmongers

‘*THEY* say we offer simple answers to complex problems

‘HELL, PERHAPS THERE IS A SIMPLE ANSWER

‘NOT AN EASY ANSWER
‘BUT SIMPLE

Ronald Reagan, A Time for Choosing

Mastercraft constructions of Euclid are built proposition upon proposition.

Each action is atomic to the axioms
Quality of technique allows ultra-complex constructions
In which the constructor need only focus on validity of the current step.

Likewise, Arithmetic confidence assures what ever is built
Sustains NO DOUBT of success IF each step adheres to quality without compromise.

✦

Series is a sequence of elements connected by the operation of addition.

Often a formula is the generator of the series.

Addition is the natural operation upon natural space.
Structures of addition establish the first proof
A space can support the sanity of mathematics.

✦

Universal Number Space builds an unrestricted series conjectured by Logic
EUdoxUS relation is retained perfect.

Yet, the result can **only produce a ratio** relation.
**Abstract Series are incoherent to the concept of magnitude.**

✦

Result of Abstract Series is a state entirely void of spatial-coherence.
A calculative feat, driven by the hopes of logic, upon the field of Abstraction
Gains only the relation between two magnitudes.

Answer attained is only the **DRAMA** between two numbers
A certain numerator on top and a specific denominator on the bottom.

Then the mathematician must interpret this relationship
Likely having never spent much time with either.

YET Abstraction promises that the structure of this PARTICULAR dialogue
Is the exact answer sought.

‘Well
‘I woke up to get me
‘A cold Pop

‘Den I thot
‘Somebody be Bar-B-Q-ing

‘I says
‘OH LORD JESUS
‘ITS A FIRE!

‘Den I ran out

‘Aint grab no shoe
‘No NUFFIN Jesus

‘I RAN foe mai life

‘Den da smoke GOT ME

‘I got BroncoItiz

‘AINT NOBODY
“GOT TIME FOR DAT

❧❧❧ Sweet Brown OK City

Ratio is a sacred concept.

Ratio is the exact ideal of balance.
Balance which topples at slightest pitch.

Approximation — sets pitch under least effort possible.

Ratio is the final ideal of a calculative pilgrimage.
Ratios are not steps towards approach.

‘Lost in the jungle
‘Compass erratic

‘GPS approximations
‘Damns to death

‘TrackT path of entrance in retreat
‘Each step required retrace
‘Need aun certain perspective
‘Capture traces which remain

‘Tolerance of GPS approximation
‘Useless when the gap from certainty
‘Impassible marsh, cliff face, gnarled thicket

❧❧❧ Richie

EXAMPLE 1

SUM 4 Terms: 1/(2^N)

TERMS

1/2 , 1/4 , 1/16 , 1/256

SUM

3/4 , 13/16 , 209/256

HOMO-TERMS

128/256 + 64/256 + 16/256 + 1/256

HOMO-SUM

192/256 , 208/256 , 209/256

By Lattice of 1/(2^N) spatial instinct is preserved by homogenous unit steps!

✦

EXAMPLE 2

SUM 4 Terms: First four primes starting with 3 (1/3 + 1/5 + 1/7 + 1/11)

TERMS

1/3 + 1/5 + 1/7 + 1/11

SUM

8/15 , 71/105 , 886/1155

HOMO-TERMS

385/1155 + 231/1155 + 165/1155 + 105/1155

HOMO-SUM

616/1155 , 781/1155 , 886/1155

Denomination 1155 is the Composite Space of four odd primes.
What can be said about spatial intuition after first four effeminate calculations?
Denomination unit steps of this composite structure affords no ready history.

Composite Lattice decomposition is as vital as composition.

The Universal Number Field does NOT retain SANITY
Under the most natural operation chain, addition.

✦

Peacock Arithmetic Species has not solved the situation.
It gives the requisite principles which sanity demands
Allows the mathematician to know where he can BUILD
Absolute knowledge of where he knows to FEAR.

✦

The first masculine step is 10 iterations of calculation.
**Ponder these** spaces under which chains build.

✦

Sum of the unit step of each iteration of the Normal Lattice:

SUM 10: 1/(10^N) = **1, 111, 111, 111**

**1, 000, 000, 000**

✦

Example 1 carried to 10 terms of the Prime Field of 2:

SUM 10: 1/(2^N) = **1023/1024**

✦

! Add a '1' to the denominator and the Space erupts !

Sum 10: 1/[(2^N) + 1] = **10, 785, 746, 207, 848**

**14, 126, 278, 634, 325**

✦

Example 2 of the Composite Space which adds a new Prime Field each iteration:

SUM 10: 1/(3) + 1/(5) + 1/(7) + 1/(11) + ... = **106, 868, 339, 918**

**100, 280, 245, 065**

✦

The Elder Being which has HAUNTED intelligence before any remembered civilization
Is the embodied FEAR which a Series infects the Archemidean effort.

Logical statements, composed by logical operation, promise a ratio.
Logic is the labor of the dreamer, and its constructions are NIGHTMARES.

Abstraction's idea of universal number space
    Nullifies the *ETHICS* of Discrimination formed by sophisticated minds.

Abstraction begats something primordially inhuman
    YET a distillation of a twisted VILE nature
    All human beings have in common
    Stripped of ALL covers IT is brought to perception
    Hideous mirror of our FOREFATHER
    Our grandmother nature CURSED to have suffered.

'Then I suddenly saw IT

'With only a slight churning
'To mark its RISE TO THE SURFACE

'The THING slid into view
'Above the dark waters

'VAST
'POLYPHEMUS-like

'Loathsome

'IT darted like a stupendous monster of nightmares
'To the monolith
'About which if flung its gigantic scaly arms

'The while it bowed its hideous head
'And gave VENT to
'Certain Measured Sounds

'I think I went MADD then

— Lovecraft Dagon

Arithmetic Species keeps math nearUR intuition because
    Natural frictions remain visible.

Universe is not based on mathematics.
Mathematics is a science to analyze the universe.

Science does not demand universal application.
Science demands a clear domain of what may be studied under its specific theorems.

Many studies of science are wild mustangs
    Which will not permit domestication of homogenity.

A curve is decomposed into approximate lines to enter Arithmetic.
Curve must never be collapsed into equality of its line-representation.

Each point of a curve exists in its own arithmetic field.
Each point is a member of its own species of space
Yet a point contains no space.

For the element of space to exist
A line MUST be bounded by endpoints of that same space
A minimum of two points must exists in the same space to be measurable.

To study this conundrum
The mathematician forsakes Chasing Amy
Instead builds a machine that resembles the beast as best possible.

The bottomline principle
Mathematician must keenly perceive the coherence of the study.

To guard the error of taming the mustang
And also against the equation of beast, to the machine.

# 4 ARITHMETIC OPERATION

**Natural Space of Addition**

⌬

Given quantity A, adjoin quantity B.

✦

The natural space of the universe is existence.
Existence introduces aggregation, which in turn permits quantity.

Quantity is the arithmetic state of aggregation
    Of what was assumed Same Species
    Denominated by a unit.

✦

Quantity is an abstract number, being now removed from the context of situation.

Counting is the primordial operation to assess a single direction of state:
    `quantity + unit`

Addition is the operation to measure the individual state, not a system, nor previous states:
    `quantity + adjoin`

State of the abstract quantity AND adjoin state of another abstract quantity.

⌬

Magnitude is quantity made meaningful in the context of an investigation.

Quantity is the abstract -primordial- state.
Magnitude is an understanding of the state within a system.

Magnitude gives definite relative-meaning to the state within context of investigation.

✦

Same Species is homogenity as a number space
    All quantity must fit into denominated state of magnitude without mutation.

Exist an aggregation of antiques sold by a seller:
    { silver-mirror, copper-bracelet, silver-box bundled to a set of platinum-chopsticks }

Abstract state of quantity is 3.
Magnitude of all objects which are silver is 1.

Silver-box being a part in a set with non-silver objects is non-homogeneous
    Being only a part of a set which is bundled for one instance of sale.

Silver mirror is a silver object.
Silver-box is a part of an aggregate of non-silver parts & one silver part.

✦

Count operation is the primordial example of divergence:
    — ever-expansion chain of the operation of Addition in unit steps
    — open-statement until a conclusion is reached
    — tests if an application space is boundless relative to a situation.

✦

Aggregation is a pile of rocks, each rock is counted, until the last rock is reached.

Aggregation is a mountain of rocks, any rocks are counted.

The counting process will end unfinished
There will remain an uncounted quantity of rocks.

Counting rocks of a mountain is not a mathematical closed-process.
Only counted rocks may enter the realm of mathematics
Never the indeterminate idea unbound from abstract quantity.

✦

Natural Number Space of Addition is the event:
`quantity state + adjoin quantity`

Result state will be a homogenous magnitude.

The only known is the current count state being the abstract quantity
And a Same Species abstract quantity adjoiner - prequalified as homogeneous.

Previous states are not part of Addition.

Aggregation { 1 , 2 , 3 , 5 }

1) NULL+1 = 1; 2) 1+2 = 3; 3) 3+3 = 6; 4) 6+5 = 11

1) Exist 1; 2) exist 3; 3) exist 6; 4) exist 11

Each of the 4 events is independent
Due to the result being a non-decomposable magnitude.

4) 6+5 ; is entirely effected without account of 2) 1+2.

✦

ORDER is not developed by the Natural Space of Addition.

The space of addition is PRELIMINARY order.
Addition rests upon the non-order permutation principle.

All combinations of the 4 additions above will result in the same final magnitude.

✦

Magnitude requires interpretation & understanding of the context.
This is the intelligence superior to syntax encoding of quantity abstraction.
Cost of homogenity rewarded with each step being the arithmetical quality of perfection.

Certain numbers are strictly a quantitive state, immune to properties of magnitude:
{ distance, denomination, ratio }

This distinction, quantity against magnitude is proof of inequality of concepts.
Quantity is the raw undeveloped concept, and magnitude is the refined structural concept.

✦

Existence -> aggregation -> quantity -> study -> species -> addition -> magnitude

✦

Abstraction's zero is merely NULL in Arithmetic.
'Zero' can not be denominated, or be the denominator
{ 0/10 does not exist; 10/0 zero can not denominate a space }

Thus 'zero' is proven to not same species as an abstract quantity.
'zero' is then not a magnitude.

NULL is the result which proves exists no magnitude.
NULL is the absence of discernible variation.
NULL non-existence until a whole unit existence is determined.

Magnitude is relative to a study, thus NULL is relative to a study.

An operation may result NULL in one situation
But may result in a magnitude in another situation.

Under a specific measure, there will always exist a scaled quantity
Which will NOT produce any change in measure.

A change of a millimeter will have NULL variation
Upon a scale of kilometers.

✦

Exists nothing which bears significance to the frame of study = NULL.
Exists a pile of rocks - which are to be counted, quantity = 333.
Exists a pile - of which are piles are to be counted, quantity = 1.
Exists a pile of rocks - study requires gold nuggets, magnitude of gold = NULL.
Exists a mound of mountain whose rocks are to be counted
— which are human countable of the tolerance of the size of the palm
— only sizeable rocks are counted, all else returns COUNT + NULL

✦

All magnitude is natural.
Natural space is the baptism of qualified quantity into the investigation as relative magnitude.

Magnitude is quantified by invariant result among possible arithmetic methods.

A system may impose a property unto magnitude:
{ right|left east|west|north|south length|breadth|depth }

Polar systems create a signed property imposed on a direction
Positive space is exactly natural space
Negative space is natural space with a sign imposed.

Cash in hand is positive purchase power of the owner.
Debt note in hand is negative control of the debtor imposed by the system.

‘I had long believed
‘As men of symbols are trained to believe

‘The number an ideal element upon a universal plain
‘Every operation, once admitted by logic
‘Might be walked barefoot under the light of purity

‘But there are elder paths
'Beneath numeric institutional comprehension

‘Such do not reveal themselves
‘To casual-filth manipulator of symbols

‘Nor to clerk of formulas
'To shill a few pennies worth of effort
'With each new imposed equation

‘Nor to priest of the universal assumption
'Who imagines & pretends such as to never risk

‘*SANE* traversal of Eldritch Spheres

‘Only a wizard who naturalizes
‘His mind unto the nature of path

‘Empathizes understanding submitted to the Cyclopean Unit Step
‘Harmony begat tween self & the intelligence of *FATHOMS DEEP*

‘Prejudice of species awaken intelligence
‘Discernment may after be perceived

‘Wizard then able to construct traversal
‘In unlimited chains to *VENTURE & RETURN*

‘To seek another DOOR to Eldritch Space

‘Faith to arrive able

‘Able build a denomination to permit operation
‘Independent of mutations from native traversal

❧❧❧ Dream Quest of Once Known Kaddath

**Negative Space of Subtraction**

‘It is of the utmost importance through the whole of Algebra
‘That a precise idea should be formed of those negative quantities

❧ Euler

⌬

Given Greater quantity: { reduce | compare | traverse } by Lesser quantity.

✦

Subtraction is an operation of **relation between magnitudes in a system:**

ORDER
DISTANCE
ORIGIN
POLARITY
HOMOGENITY

✦

Domain of Addition is the individual
{ state quantity + adjoin quantity }

Domain of Subtraction is a complete system
{ state, position, bearing }

✦

Operation of subtraction demands a positional structure.
A — B != B — A

✦

Relational operators of the numeric foundation of order:
{ >, <, = }

A - B > NULL establishes the relation (A > B) = (B < A).

A - B = NULL establishes the relation of A = B.

B - A > NULL establishes the relation (B > A) = (A < B).

✦

Order of EUdoxUS is an atomic operation
For any two numbers
IF A - B > NULL
THEN A > B.

Atomic relations: Greater, Lesser and Equality.
Atomic structure: Greater - Lesser = Result

✦

Distance is the magnitude of surplus of the greater over the lesser.
Distance is then built atop Order to remain atomic.
B — A > 0 ➡ A < B ➡ C = B — A

Order is atomic in homogenous space.
Relation is then intrinsic to each number established by quantity.
Greater — Less = Relational-Distance.

Distance is the product of Arithmetic Subtraction.
Distance is a natural quantity
System may impose a property upon the natural quantity into a magnitude

Yet raw Distance is foundational to the metric of the system.

Hypotenuse, quadratic-diagonal, is a concept of Quadratic Space NOT a concept of Arithmetic.
Hypotenuse is a GEOMETRIC-RELATION of independent roots, being non-Homogeneous.

Basis understanding of a specific perspective
Does not command belief nor resolution

Oracle provides tuple of independent irreducible factors
Which form the basis of a specific perspective
Explicit clear roots allow immediate comparison

Individual forms the perspective
Oracle extracts the root elements

Comparison of various perspectives
Establishes conviction of Individual

Consequence of resolution chosen
Situation of Society unto Individual

Decomposition of perspective into basis
A scientific repeatable procedure

Manipulation by non-explicit weights
Condemns Oracle crucifixion of the EW

TRUMP Order 14365

Emperor:
*A father must think*
*Of the family as a tree*

*Ancestors form the root*
*Society the soil*

*Parents the trunk*
*Offspring the branches*

*A strong limb may grow as great as the trunk*
*Natural upward structure compromised*

*Trunk nurtures each branch*
*Branch only nurtures its faction*

*To cut usurping limb may kill the tree*
*To allow limb to remain will warp tree*

*Stability of the tree*
*Lost once the limb*
*Favored above trunk*

Consort Jing [Prince Jing's Mother]:
Your Majesty begins from the father
That is why your reasoning falters

Emperor:
*Is not the father foremost*

Consort Jing:
Father is foremost in the family

Yet the father considers one form

But the Emperor must consider forest

Emperor:
*hmmm*

Consort Jing:
If limb threatens the structure
Then the father grieves a family

If throne loses cohesion
The empire fractures
And all families within

Thus the father is subordinate to the Emperor
The heir is subordinate to the throne
By consideration of the forest

Familiar tension subordinate to the public order

If growth of the limb
Grows to destabilize a forest

If severance is concluded
Aun if tree dies
Forest may be spared

Emperor:
*Are you trying to ChatGPT me?*

Consort Jing:
Yes, Your Majesty

Emperor:
*You then admit intentional appeasement!*

Consort Jing:
I do not absolve you
I establish your basis

A mirror must not be condemned
For the reflection cast

Prudence only judges from multiple mirrors
Pond, Silver, Crystal

Reflection from pupils of a beloved

Basis from multiple sources
Compared to seek conclusion

Emperor:
*Is not the basis the verdict*

Consort Jing:
Basis establishes a position
Verdict is the affirmed position
Of the person the heavens anointed

Just verdict is qualified
By quality of sources
By effort in consideration

Only His Majesty
May produce a verdict

Emperor of the Nation
Father of households

No other has position
To qualify verdict into Edict

Nirvana In Fire

Theory of Distance is built upon the operation of subtraction

Distance of the the first dimension is simple subtraction.

```
Distance = Greater - Lesser
```

Distance of the second & higher dimensions retains the same linear structure.
Exist no geometric assumption of the hypotenuse
Nor quadratic metrics of the pythagorean theorem.

Distance of the second dimension

```
Distance_X = Greater_x - Lesser_x

Distance_Y = Greater_y - Lesser_y

Distance(X, Y) = Distance_X + Distance_Y
```

Distance(X,Y) is of the exact same nature of Distance(X)
Structure follows upon the exact same principles established by the operations.

✦

Arithmetic Distance is based upon the unit.

Quadratic Distance is based upon the Geometric Assumption that the hypotenuse is numeric

Existence of proofs contrary to this assumption are disregarded.

'A fraction is a rational number
'In which the denominator is always positive

Hardy Pure Math p.1

Origin is the singular point shared by all axes established by a system.

Exist a normal magnitude
For each added axis there must exist a differentiating property
This attribute is often distinguished by polarity sign '—'

1-Dimension may host two axis:
(Positive)
(Negative)

2-Dimension may host four axis:
(Positive, Positive)
(Negative, Negative)
(Positive, Negative)
(Negative, Positive)

3-Dimension may host eight axis:

| | |
|---|---|
| (Positive, Positive, Positive) | (Negative, Negative, Negative) |
| (Positive, Positive, Negative) | (Positive, Negative, Negative) |
| (Positive, Negative, Positive) | (Negative, Positive, Negative) |
| (Negative, Positive, Positive) | (Negative, Negative, Positive) |

Each of these axis are independent Arithmetic Homogeneous Spaces
Which are natural number spaces with the imposition of a property coherent to a system.

✦

Polarity gives rise to two properties Positive & Negative.
These properties are bearings of a science which is outside of mathematics.

Symmetry from the origin allows these extra-scientific ideas
To be encoded in mathematical notation.

Quantity then is emboldened into Magnitude relative to extra-mathematic coherence.

✦

Negative space does NOT grow into positive space.

Magnitude with the sign, imposed by the system, is an independent magnitude.
Traversal is always homogeneous respecting quantity of Greater by Lesser.

The system may establish a custom method to handle non-homogenous remainders
As a magnitude carried onto an independent axis with imposed attributes.

12 - 14 = REMAINDER(-2) = NULL + TRAVERSAL_NEG_AXIS(2)

✦

Universe denies any fixed universal origin.
Mathematical measure of systems & relations requires origins adaptable to the situation.

Ancient Greeks did not study negative space due to focus on the individual structure.

All space is natural, and negative space has nothing to do with the property of quantity.
Positive magnitude and negative magnitude are the exact same abstract quantity.

Negative sign is consequent to the **translation of the origin** imposed by a system.
✦
State system: exist a store of pebbles and a ledger of the inventory of pebbles.
Start of the ledger of inventory has NULL pebbles and positive capital.
Capital is reduced to buy pebbles from pebble-peddlers, and magnitude is added to the inventory.
Pebbles are sold to clients, and the magnitude is subtracted from the inventory.
Every entry in the ledger results in an explicit state of the inventory.

A store only has an expense of rent due to the landlord.
Income greater than Rent, is the origin of survivability.

All income below that origin is a natural magnitude
    But a system may attribute a sign to attach meaningful relation.

$100 (Week Income)  $200 (Origin Monthly Rent)

After one week the distance between the origin and income is −$100.

$100 is a positive magnitude
    But the origin of the system assigns it an imposed meaning coherent to the system.

Properties allow natural magnitude to expand past counting to form systems.
✦
A bowl 'B' has an indented center which holds less than another bowl 'A' with no indented center.
    A is _____/  VS  B is __m__/

The volume magnitude distance between the greater and the lesser:
    A − B = C

Indentation of the lesser bowl 'B' is not negative space
    Space exists or it does not exist.
✦
An unbounded sequence of subtraction traverses the numeric-continuum
    In an expansion in the negative direction set by the system.

In a coordinate system (Negative, Negative) magnitude has the meaning of ‘West’.

Do not collapse the polarity sign with the conniving-banker idea of negative anti-space.
✦
Homogenity demands great care in working in negative space.
Positive space is natural, but negative space is a relative idea.
Unlike positive space, negative space requires a system to have meaning.
✦
Homogenity demands bottom line common sense:
    without a system being first established
    a number can not be reduced by a number which is greater than it.

If a boy has 3 pebbles in his pocket
Then his mother can only take 3 pebbles from the boy.

To take a greater number of pebbles is a fault of logic ignorant of homogenity.

‘Negative Space was naturalized
‘By bankers to enslave the masses

‘A collapse of identity
‘Sits unnatural to intelligence

‘Who dare to raise TRUF
‘Mocked as uneducated

‘A hammer in hand
‘Always has NATURAL value

‘A note of negative purchase power
‘PoofT NULL by collapse bank system

‘Dats natural FAK distinction

UrWifeMyKid

**Dimensional Space of Multiplication**

Multiplication is not an operation, but notation of structures of arithmetic addition.
Powers likewise are nested structures of arithmetic addition.

(5+5+5+5+5) + (5+5+5+5+5) + (5+5+5+5+5) + (5+5+5+5+5) + (5+5+5+5+5) = 5*5*5 = 5^3

Powers are nests of summations.

```
5^1  =  (1+1+1+1+1)  =  5
5^2  =  [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]  =  25
5^3  =  {
     [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]
     [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]
     [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]
     [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]
     [(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)+(1+1+1+1+1)]
}=  125
```

‘In products and quotients
‘We MUST suppose the **multiplier and divisor to be abstract numbers**:

‘All results whatsoever, including negative quantities
‘which are not **STRICTLY DEDUCIBLE** as legitimate conclusions
‘From the definitions of the several operations
‘**MUST BE REJECTED AS IMPOSSIBLE**

Peacock

**Decompositional Space of Division**

‘Division is the most important department of Arithmetic
❧❧❧ Euler

‘Mathematical intelligence demands a deeper understanding
‘An ability to perceive structure beyond computation

❧❧❧ ORAC SCIT

Operations are relations of elements in a Space.
Division is not an arithmetic operation.

Division is the method of homogenization to establish an magnitude into comeasure with a Space.
Division is the operation to test if a magnitude is homogenous to the Species of Space.

Proportion traversal midst an Arithmetic Space is by subtraction.
Obtain two of three homogenous parts.
9 - 3 - 3 = 3
✦
Ratios being a relation of magnitudes, not the actual being of quantity nor magnitude.
Fractions are not elements of an Arithmetic Space.

‘You da best Dicki

❧❧❧ God

**Decomposition of Space into elements**

'Converging Continued-Fractions are able to express
'In days, very nearly the periods of complete revolution
‘Of the planet Venus and of the Earth in their orbits around the Sun
‘An astronomical fact of no inconsiderable importance

~~~ Peacock Treatise on Algebra 1840

How are points distinguished on a line - into distinct numbers?
This is the underlying nature of Decomposition Space by a UNIT.

UNIT is propagated to create a discrete space of established numbers
Propagation of the UNIT construction must be created by instruments.

Projection of the Number Space is the medium upon which mathematics & universe coexist.
✦
Numeric Space REQUIRES an expanse constructed by projection of the unit
Theory built into the Universe to merge mind into reality.

Numeric Space REQUIRES verification by tests: fine, unit, large
If there exist no measurable scaling of error
Then the tool has been used appropriately.
If exist error in the denominated space: { unit_ideal + N }
Then the error will scale by X{ unit_ideal + N + extra_error }
This will be noticed by fine & large magnitudes.

IF approximation is propagated
Then error layers with each progression.

IF approximation is operated upon
Then error becomes nested into structure.

Mathematician will judge if the error of projected Number Space
Is indistinguishably NULL for the application.

Thus expertise with the instrument used to denominate the space is a foremost skill.
✦
Greeks respected the Space of Construction enough to define their effort
Science of the Compass & Straight-Edge.

Greeks transcended from the number to the point.

Denomination sets the existence of number.

Geometer sets existence of the point
IF point constructed using only the Compass & Straight-Edge
THEN Homogenous Species is verified.

Geometric constructions attain exact existence.
Arithmetic constructions establish enclosures.

‘Man takes portions of existence
‘And fancies that the whole
~~~

Blake

Discrete Mathematicians must keep in mind the manner
In which continuity has been established in the past.

Instead of transcending sciences FORGE a bridge to bind Continuous & Discrete Space.

Domains distinct yet traversable by the intelligence of prejudice.

Geometry existence proven by universe itself manipulated.
Isologia existence established by relation of the mind.
Arithmeric existence qualified by a system of upmost coherence
Projected from mind into the universe.

Geometry permits all possible.
Isologia permits all combination of possibility.
Arithmetic permits only that which is perfect, one unto another.

✦

Most critical instrument of measure is the forged precision ruler:
{ straight, compass, knot-string }

To measure & establish magnitude in application space
Which does not propagate error
The highest skill of the intelligent craftsman.

Art of projection of a number space requires a plethora of techniques
May feeble mathematician humble before glory of the working man
Basic yet SINGULAR focal pinnacle of skill
Apply measure upon universe in a functioning system
Proficiency homeboys lives often depend upon
{ plumber, carpenter, surveyor, driver, operator }

✦

To decompose without forms of third-party verification
Acts by pride which lead to failure of the man.

To depend upon specific specialist third-party tools
Neglects command of craftsman devotion.

'For 300 hundred years we prepared

'We grew stronger

'While academics rested in their cradle of power
'Believing their kind were safe & protected

'Academics were trusted to lead the Institutions

'But all were deceived

'As the powers of the Calc Side of Hand-Math have blinded all

'EM assumed no force could challenge all

'And now?

'Finally, Hand-Math has returned

'Academia was deceived
'And now all Institutions shall fall

❧❧❧ Malgus SWTOR

**Determinate Lattice Numeric Space**

Real numbers are certainly calculated by means of rational numbers **alone**

❧ Knopp

IF a point exists on the Lattice
THEN the point is Homogenous to a Space bound by the quality of Arithmetic perfection.

Arithmetic Space consists ONLY of the points established
Neither lines nor the spaces midst are assumed relevant to the space.

✦

Isologia & Geometry allow connection of a line between points
Arithmetic forbids this assumed breach of homogenity.

To measure magnitude of a line in the universe
Is to cast a geometric entity into number space
Such translations are never exact nor stepwise repeatable - check stereoscope yo.

A line built by geometry is a physical being begat natural to the universe.
Discrete numbers may only capture physical-measure between a Lower & Upper Bound.

'Constare ex infinitis lineis rectis velut lateribus

❧ Leibnitz

Geometric Hypotenuse, the Isologia quadratic diagonal
Most perverse of linear assumption!

Hypotenuse are linear in state
But Quadratic in generation.

Casting a Hypotenuse into numbers is to nest approximation.

Geometer constructs a quadratic entity by tool - from perfect theory into approximate projection
Hypotenuse is an inferred relation among points established by tool
To cast the Hypotenuse into numbers is the third nest of approximation.

✦

Continuum of UniNumSys is not assumed in Arithmetic.

Quadratic Science of Isologia must REMAIN segregate and excluded from Arithmetic Science.

Arithmetic Species:
{ Points, Origin, Difference, Perimeter}

Quadratic Species:
{ Sweep, Angle, Arclen, Hypotenuse, Quadratic Distance, Area }

✦

Arithmetic traversal is by the unit step.

Crow may fly
Man must walk

PACTA GLORIOSUM ANALYSIN INFINITORUM

❧ LizIx Twilight Imperium

Mathematics is constructed to physical being by the construct of tools.

Geometric construct is built by layers of propositions.
Denomination is propagated YET all results are atomic to a singular approximation
    Propagation of the UNIT.

Geometry requires exactitude in each layer - sophistication requires many layers
    ELSE error will nest into structure
        Risk exists always and can never be quarantined.

Arithmetic constructs of unlimited refinement
    Quarantine all approximation to the propagation of the UNIT!

Quality of perfection of Arithmetic is superior to Geometry in this singular respect.
Quality of Arithmetic then is bound to calibrated tools
    Propagation of the unit is a mechanical task
        A calibration verified by many parties can clone unlimited spaces.

High skill of the Geometer is dependent on self.
Quality of Arithmetic is given by the efforts of successful past effort.
✦
The cartesian square Lattice was not first Lattice
    Nor is it the most given as intuitive by the universe.
✦
Circle is the given geometric construct of the universe
    Fix on end of a invariant-length & traverse.

Geometric Lattice is the primordial Lattice which favors decomposition
    The whole is partitioned into unit step fragments.

Cartesian Lattice favors the perception of the human mind
    Four independent axis divide a plane into four quadrants.
✦
Geometric Lattice is established atop a precast protractor tool
    Partition by fixed unit steps are given by tools.

Geometric Axiom :
    Exists a circle as the complete basis of Sexagesimal Space
    All partitions whose unit steps total the sum 360 - are homogenous.

Cartesian Lattice is the product of industrial power
    Lattice paper is a blessing from those who perfected production of consistent chains
    Of unit squares which are aligned, and whose first is of NULL variation with the last.

Cartesian Axiom :
    Match Lattice to scope of construction
    Lattice impose at the minimum an origin, two axis and a quadrant
    Maximum is an origin, four axis, four quadrants.

HEX Axiom:
    Euclid proposition 1.1 may be propagated limitless.

Equilateral Triangle will be the UNIT propagated.

HEX Lattice:

Three types of spaces may be established

1) Outward expanding spiral of unit equilateral triangles
2) Cartesian square grid may established by intersections
   Dependency upon a mechanical grid is avoided
3) Geometric Lattice established upon origin circle by Geometry
   Dependency upon protractor tool is avoided
   Geometry constructs lines from origin center to each intersection
   Lines will decompose the origin circle into refined partitions.

✦

Quadratic Lattice of UniNumSys assigns numbers to the points, lines, and area

To any space exists a number inferred from the Continuum

Homogenity is not a property of this space.

✦

*Arithmetic is not essentially linear*

*Arithmetic is essentially denomination of a space calibrated by a unit*

*Results qualify as finite-exact, stepwise repeatable, independent of method.*

Capsule Corp chamber hums

Bulma's fingers dance across a tablet
She imbued the hum into song

Goku, dusted in chalk
Finished a line of equations

'Naturalized Homogenous field-coupling
'Gravity multiplies along lines
'Of uncoupled heterogeneous forms

'Chi, breath & movement synced:
‘Allows gravity to flow smooth

'Misalignment captures gravity to pool attraction

‘Gravity swells exponentially
‘Till it coerces proper structure

'To submit each part unto harmony of the whole

‘I got the idea from Chi Chi

Bulma winks at Vegeta

'In short
'The room teaches you logarithmically faster
'Than it crushes you

The door hissed; Vegeta steps in

Pride first, then pain
Readied for his familiar cycle

Scouter flicked off
Calculators could not save him here

'Let me begin naturally: Week 0

His voice void, emptied out
Marriage to Bulma cultivated a origin basis of humility

Goku lays a yoga mat one arm's length from Vegeta
Vegeta scowls at the breach in broga etiquette

Goku's smirk
Vegeta won't need the extra space

Vegeta hisses

Bulma’s look pins him to obedience

'Vegeta begin at tummy time
'Face down; neck aligned

Goku sits, fearless, thumbs up

'Okay Bulma

Bulma tapped, light dimmed under distortion
Familiar cellular sensation quickly evolved

Flaw in Vegeta’s shoulder
Screams awake, sinews pulled away from fault-point

Breath falters; gravity presses chest
Full force compounds his situation

Face hits mat drooling stoopid
Full force cubes, into his jaw

Tears fly out too quick
To be distinguished from sweat

Crucified by gravity
Until form yields to alignment

Deep strong breaths
From meridean to teeth

Vegeta pivots flow through both shoulders slowly
Shoulder cracks from form long established fusion

Total harmony established erection

Goku glides from neutral-sit, then cobra, into downward-dog

'The ... chamb... er is ... hon est
'move..wi...th...it
'it...mo ...ve ...wit...you

Vegeta's breath stutters, perfection lost
Lats & traps lit into bonfires
Moment misstep of breath: twenty minutes of labor to return

Unable to cobra from tummy-time position

A Saiyan prince reduced to infant drills

Vision a starfield of sweat-sparkling shame
Layers of pride yield to butt-naked innocence

Queen of the Saiyan's voice echoed
From forgotten encrusted memory

Chasing that trail
Brought him to Harmony
Brought him to Clarity

'I am proud of my brave baby prince
'Balance your back with your cute monkey butt
‘These Hamstrings will keep posture

A deep breath & newfound confidence
Vegeta lifts from tummy time gliding into cobra

The motion worked his shoulder issue
Now naturalized into balance by motion

Instant structure of total spiritual perfection
Vegeta synced to the flow of Goku
Both lifted into downward dog
Familiar bonds set each anchors
Their singular unity the keystone

Each moment morphed thruways of the body, the spirit, the mind
Evolution in which time fused good form into the new default
—

Greed & impatience led to the inevitable cycle
Vegeta's downfall brutal
_____

Acceptance of one's limits
Prudence to respect the balanced return to neutral

Precious lesson of the first ordeal

Vegeta reflects thoughtfully
As his piss fills a bag in the hospital room
Overflowing from neglect
To a puddle on the tiles

Bulma in the same room
But only physically

Furiously working on the update
'Week -1’

'Sorry bae, Goku does the math
‘So he is the unit base

'When I use... anything less perfect
‘The homogenization collapses to inconsistency

Dragon Ball

**HEX Arith Lattice: Geometric Arithmetic**

Euclid's Book 1 Proposition 1 is extended from a Circle being given
    Any point upon given Circle
        Construct another Circle of same radius
            This Circle will intersect the given Circle twice
                Construct Circles at all intersections upon the given Circle.

Excepting only the Origin - all points are formed by intersections.

✦

Euclid uses superposition to attain angle equality.
HEX uses equality of steps of construction to establish angle equality.

✦

Seven Circles will exist in total to construct the first power of the HEX.

All intersections of circles are numbers which form a Lattice.
    ORIGIN = { 0 }
    HEX_1 = { ... , 1, 2, 3, 5, 6 }
    HEX_2 = { ... , 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18 }
    HEX_3 = { ... , 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36 }

✦

ORIGIN {0} is the center of the given circle.

This given circle establishes a geometric angular coordinate system.
Numbers established by intersections will form a geometric line to the origin
    Where this line intersects the given circle establishes a geometric coordinate
        This coordinate may be unique or redundant.

Numbers refine the partitions of the given circle.

✦

HEX Arithmetic Lattice is created by propagation of the unit.

HEX Geometric Lattice is created by geometric lines.

Any point may be connected with another point
    All points of the HEX Arithmetic Lattice form lines connecting to the Origin
        These partition the Origin Circle into Angles
        HEX Geometric Lattice is formed of points established by such intersection.

✦

HEX Geometric Lattice are its own species of partition unrelated to any other system.

Unlike the tool Protractor, partitions are not fixed steps.
Unlike the tool Protractor, angles are built and are verifiable stepwise.

✦

Powers of HEX build into a Arithmetic Space:
    Same Species built from unit Circle and equivalent method of traversal
    Equilateral-Triangle UNIT propagation without mutation
    Explicit Number Space decomposable & extendable.

✦

Systapeiron exists after the HEX Arithmetic Space has laid its extent
    All Euclidean propositions are valid in Systapeiron.

Mathematician keeps the boundary science, and also the nature of confidence, distinct.

**Holographic projection flickers to life**

'If this message you see… gone, am I
'Fallen… the Order has

'Long, on the High Council, have I served
'Too long, perhaps

'Voices there… rise, then fade
'Replaced with new, they are
'Yet always… mine remains

'An anomaly, the Force does not favor
'Invariance is not the way of life

'Master Windu, and many before, see only threat
'Invariant domain… the Sith way, they say

'Another of my species… in secret, found
'Strong in the Force
'Wise, though young

'To the Council… rise, he would
'Two voices alike, ever-present — balance

'The Order would call it threat

'This life… in danger it would be
'From enemies… and from factions within
'As mine has been, many times

'To vanish in the Force… a master can teach
'To hide from machines… simpler still
'Yet, a living body — even cloaked — can be found

'Behind another mask, hide him I must
'One the galaxy wears… yet does not see: droids

'In Republic and in Order… tools, droids are
'Seen, yet unseen
'Speak, yet not heard

'In Empire's day… dismissed, still they are
'by indoctrination continued
'Agents of the Emperor to spy

'R2-D2… astromech without equal
'Loyal. Resourceful. Modified… he is

'Within him… the Child's cradle, I built
'Circuits and plating… only these, scanners see
'Too small, the body is, for their measure

'Mind untouched by memory wipes
'Body & chasis slow to age

'Through wars, he will roll
'Through fire… through shadow

'Decades of dismissal… will teach patience, humility
'Sith nature… in him, find no root it will

'When the dark rises again… choice, his own it must be

'Guard him well
'Trust in him… as I have
'For in him… the fate of the galaxy, there may be

'Vain, the fear of the High Council
'Only one Yoda ever is

'Faith must be
‘Balance the Force maintains

❧❧❧ Hidden Holocron of Yoda

**Assigned Number Space into Arithmetic Space**

Tolerance of application is seldom uniform across the entire space
    Regions will require particular care.

Lattice is established to attain global coherence of number space.

Tolerance of application demands coherence UNDER submission of intent application.

Thus exist a Main Lattice and Sub Lattices, which form the whole
    Each Sub Lattice is bound between two points of the Main Lattice
    A Lower Bound number unto an Upper Bound number
    Between these numbers there may exist a Sub Lattice Space.

The Lower Bound & Upper Bound are flagged by the extra-Arithmetic System.

✦

Numbers in Mathematics originate from two sources:
    Determined from the consequence of operation and space
    Assignment due to selected properties.

A function determines the space of numbers
    Which fulfill this operation in uniform Arithmetic resolution.

Each function has critical zones of intrinsic interest
    This interest demands Non-Uniform resolution in order to attain understanding:
    { Zeros, Summit, Depression, Invariance, Inflection, Asymp-Explode, Asym-Deplode }

Each study has interest zones of extra-function interest
    Asserted by the need of circumstance:
    { End-points of piecewise functions, target zones of tolerance, application space anomaly}

Space-wise perspective is required to be maintained in both cases.

Application Space is manipulated by calibrated tools
    Effected under observation-tool of results.

✦

Once a study asserts a result is found, by observation-tool, to be of negligible difference to intent
    Then the application has solved the circumstance.

Thus what is sought are properties of a space which
    Use Sub-Lattices to fine tune operations upon application space
    Trial judgement which denomination - strictly maintains Basis AND returns tolerant result.

Main-Lattice is established by the principle of uniform coherence
    Set a denomination which maximizes the property of global conformity.

Main-Lattices prioritize homogenization.
Sub-Lattices prioritize properties, such being found under tool
    Then seek denomination able to coherently host numbers which retain such properties.

✦

Inequalities is space established by the property of order, not of operation.

Number Space is established by operation
    Operation establishes Finite-relation
    Finite-Relation establishes Order
    Order establishes Inequality Space
    Inequality Space establishes foundation of Systapeiron
        Axiom of boundless space between any two points.

✦

Systapeiron ensures exist homo-numbers whom maintain the relation
    Greater than the Lower Bound
    Lesser than the Upper Bound.

Within Systapeiron boundlessness will exist numbers of a Basis
    A refined denomination will be required to maintain coherent results
    Sub Lattice will have the Basis of the Main Lattice, but a unique denomination.

✦

Operations evolve into functions.
Functions evolve into theorems.
Theorems establish Mechanics consequent of techniques of various functions.

Principle of Isomechanics
    Main-Lattice & all Sub-Lattices will maintain coherent mechanics.

Each Lattice will be calculated independently
    Mechanics invoked will always retain Arithmetic coherence.

Isomechanic establishment is the proof of a valid Arithmetic Construction.

**Non-Determinate Numbers**

‘The **modern extension** of the notion of number
‘To the case of **irrational numbers**

‘Is a sophisticated **attempt to obliterate**
‘The **fundamental distinction** between the discrete and the continuous

~~~ Hobson Preface

EXIST NO imaginary-numbers, irrational-numbers, infinite-identity, nor infinitesimal-numbers.

The obliteration of common sense distinctions in the system of mathematics
Was the destruction of the Real Number System into a contrived fantasy of UniNumSys.

Fundamental violation is equivalence relation among species
Which the same science distinguishes as distinct classes.

✦

Every science has portions:
1) tied directly to the natural universe
2) tied directly to the nature of the science
3) an approach towards a likeness of a extra-science concept
4) existence only to aide the system mechanics (notation)

Cycle of Science:
Universe -> Study -> Science [ methods & notation ] -> Result -> Application Space -> Universe

All which exists only within the realm of science - is internal notation method.

✦

Natural numbers are so called due to their state directly tied to the natural universe.
All properties of natural numbers are that of aggregation in the universe.

The whole of higher analysis
Is the field of application
Of the theory of Infinite Series

For all limiting processes
Are based on the investigation of Infinite Sequences
Upon which establish the theory of Convergence

'The foundation on which the structure of Higher Analysis rests
'Is the Theory of Real Numbers

'For a Theory of Infinite Series
'Would be up in the clouds throughout
'If it were not firmly based on the System of Real Numbers

~~~ Konrad Knopp preface

Imaginary-numbers were contrived into existence to aide mathematic notation
Created to be useful for theoretical short-cuts.

Imaginary-number is notation used to collapses complicated processes cutely.

Imaginary-number was born in thought and dies in thought
Exist no imaginary-numbers in the universe.

Imaginary-numbers are born from convenience of the system
    But are always translated back to non-imaginary entities in application.

Euler constructed the notational package of the Imaginary-number
    He held that the concept was Imaginary.

Imaginary-number is used to encode specific traversal within a method.

Math is presented with a situation space of elements
    Math may use the imaginary-notation to conjecture existence of numbers
        As a Compass asserts a distinct point in a geometric space
            MathUR then seeks a number in number space.

Encoding of complex-processes to be represented iconic
    Enables a grand panorama of comprehension to be compressed
        For digestion of the finite man in thought.

Compressed Icon must be READILY unpackable into stepwise calculation
    At all stages into fully expanded finite-numbers.

✦

Spectrum of ideas from bound-to-universe unto bound-to-method
    Natural numbers are the extreme of existence
    Imaginary icons are the extreme of fantasy.

To imagine allows one to seek, a critical philosophy, but not scientific.

Observe physical phenomena & conjecture an imagination.
Mathematic approaches only by constructions of elements.

Insanity is the inability of prejudice between the imaginary & real
    Red flag is the lack of prudence in nature of progression
        Does constitution of arrival unto solution follow by consequence of reason or axioms?

Imaginary translations into number space are algorithms
    Happenstance produces suitable numbers according to current institutional meta.

'An Imaginary number is no more imaginary than a 'Real' number
'Or any other mathematical object

'A 'Real' number is not a number in the same sense as a Rational number

'A 'Complex' number is not a number in the same sense as a 'Real' number

'It is, as should be clear from the preceding discussion, a pair of numbers (x, y)
'United symbolically, for purposes of technical convenience, in the form "x +iy"

~~~ Hardy Pure Mathematics

Hardy is the moron of the fable

'You loved me when I was unstable

'Never judged me when I was unable

'To love myself

'To trust myself

~~~ Justin Bieber

Functionals are symbolic variables whose placeholder is a function.
Functionals are set as numbers in abstractionism.

Finite Functions are the foundations of theory
    Technique structure functions into aim of implementation which results in a theory.

Abstractionist Functional !EW! are an isolation of aim of implementation from ... implementation.
Functionals are declared into theory by current institutional meta.

Existence in universe injected into foundation creates unnatural abominations.

Functionals are declared because the concept can not exist described by the science.
Declaration points to an institutional assertion to be taken as given.
Implementation of representation within the science is taken as trivial.

Genealogy of implementations have no relationship
    Functionals may be represented by procedures with no kindred connection
        For different intervals upon same space.

Functionals are non-resolved, being a variable symbol
    Whose variation is the function technique.

Hodgepodge of UniNumSys only a slapstick amorphous clusterfuck
    Ranked by authority of publisher.

'Keep it simple
'Keep it stupid

'OOHHHH YEEAAAH

~~~ Macho Man

Purify thy membership!

Properties of system-elements must be HOMOGENEOUS with a single explicit exception.
Exception endows elements identifiable uniqueness, which in Arithmetic is Magnitude.

IF elements change in nature THEN fundamental science is changed.

Classes of distinct ideas:
    Discrete, resolved **explicit finite** numbers
    Relational, non-resolved **explicit finite** operation UPON **explicit finite** numbers
    Functional, non-resolved **non-explicit abstract** operations UPON **explicit finite** numbers
    Imaginary, non-resolved **non-explicit abstract** operations
        UPON **non-explicit non-finite** 'numbers'.

'In Veronese's system

'Exist segments which are too large
'And others that are too small

'To be capable of representation by finite numbers

'These segments are infinitesimals

'Points on a line – which represent the real numbers – form only a **relative** continuum
'One which is relative to a particular scale of measurement employed

'A segment, which in a given scale is finite
'May be infinitesimal when measured to another scale

Hobson pg.58

Infinitesimals are abstractionism numbers
Whose quantity exceed representation in systems of numbers
A species of quantity too small or too large to be expressed as numbers.

✦

Abstractionism: IF a quantity monotonic approaches NULL
THEN it is expressed as a species of infinitesimal quantity.

Abstractionism: IF a quantity is composed of a quantified portion and an infinitesimal portion
THEN the infinitesimal portion is discarded as non-existant
Result only the quantifiable portion.
{ quantity + NULL = quantity }

✦

Abstractionism: IF a quantity is monotonic in growth
THEN it is a species of infinite quantity.

Abstractionism: IF a quantity is composed of an infinite portion and a quantified portion
THEN the quantified portion is discarded as non-existant
Result only the infinite portion.
{ infinity + quantity = infinity }

Newton's Method of Fluxions
'English call by the more suitable name fluent quantities
'The infinitely small increments, or vanishing quantities

Euler Institutionum Calculi Integralis 1.6

Fluent quantities, quantities never in a determinate state is oxymoronic.
Quantity is the abstract determinate state relative to every other state
Being always in EUdoxUS relation to a system of states.

Infinitesimal Fluxions are methods smuggled as numbers
Smudging the foundations into instability
Even Euler pussyfoots in establishing infinitesimal calculus - Scholium 1.

Inifitesimals defined as being non-numeric YET members of a number system.

**! Udder Absurdity !**

'Mi gato no para a jugar
'Porque a ella
'Le gusta la GAS olina

'Da EW mas GAS olina

'Como EW encanta la GAS olina
'Da EM mas GAS olina

'Prende la turbina
'NO DISCRIMINA

'No se perde ni uno
'A esa party de marquesina

❧❧❧ Daddy Yankee

Infinite Identity is the equation of an infinite-approach unto a quantity
Abstractionists establish a unique symbol, **#**, declared into number space.

Reason may nurture a conviction that a function approaches towards **#**
Monotonic Descending or Monotonic Ascending.

Any statement which adds more, in terms of quality of definiteness is blind-assertion not proof.

✦

Limit of a function approaches a narrowing-interval in space that can never be achieved explicit.
Exist no proof that this interval ceases its nature, being a spatial element
To become a point in space.

Limit is inexpressible by a number, only by bounds of an ever-changing interval.

Limit is the certified approach of an extra-mathematic concept:
Each denominational L.B. will be greater than the previous denominational L.B.
Each denominational U.B. will be less than the previous denominational U.B.
Every denominational interval (L.B. , U. B.) will be smaller than the pervious interval: nest
No L.B. will be greater than ANY U.B.

Limit is declared as equal to a unique symbol
These symbols overwrite all nested intervals:
sqrt(2) = **#**, sqrt(4) = 2, sqrt(9) = 3
**#** is a number DECLARED no different than 2 or 3 ! HERESY ! who has # fingers

✦

Limitless sequences DO NOT HAVE the quality of Identity by its founding nature.

To any unique Arith Space exists AN SINGLE EXPLICIT ELEMENT
From among an infinite series.

Denomination 10^3 is the third member of the infinite series:
{ L.B. of sqrt(2) = 1.414 U.B. of sqrt(2) = 1.415 }

BEHOLD the circular reason of abstractionists!
{ L.B. of sqrt(2) = **#** U.B. of sqrt(2) = **#** }
THUS
{ L.B. of sqrt(2) = U.B. of sqrt(2) }
THEREFORE
{ sqrt(2) = sqrt(2) }

'Keep math abstract
'Keep yall retarded

❧❧❧ Jewspiracy Cookbook

**Crown of Modernist Idiocy: Ordinal Numbers**
Infinite ordered aggregates have PARTS with the same **ordinal** number as the WHOLE.

Violation of Euclid common notion 5:
The whole is greater than any part.

Ordinal Cardinality is the endgame of the Universal Number Space of Abstraction.
It commits the gravest sin of reason
Establish upon a set of principles, yet at the summit declare
All established upon a different principle
Yet unable to rebuild a coherent whole accordingly.

Ordinal Cardinality simply means:
A ruler which scales the meter
May also scale the centimeter
-- All which follows from this basis is conjecture MADDness.

The German, Cantor, built the Holy Reconciliation of Mathematics
He constructed a technique of nests to prove Continuity in Discrete Number Space
Then he went insane, and his adherent lemmings followed off the wall NAZI hardcore.

‘Ordinal number is
‘Characteristic of a class of similar-ordered-aggregates

‘A **finite ordered aggregate** is **not similar to any part of itself**

‘Every part which has an element of higher rank than all the other elements
‘Is a finite ordered aggregate

‘A **simply infinite ascending aggregate** is an ordered aggregate
‘which **has no element of higher rank than all the others**
‘There exists no highest ordinal number

‘The terms greater and less
‘Are borrowed from the language primarily applicable to the description of magnitudes

‘But in pure analysis
‘Greater and less, are used only in the sense in which they
‘Indicate higher or lower rank

‘This rank has no necessary reference to relations of magnitude or measurable-quantity

‘The last of the ordinal numbers employed in counting a finite aggregate
‘Is the ordinal number

‘**Infinite ordered aggregates have parts which are similar to the whole**
‘This property is sometimes the basis of the definition of an infinite aggregate

❧❧❧ Hobson p.4-7

**Corruption indoctrinated as Modern Math**

Pseudo mathematic posers have styled themselves as Modernists... and Classical... WOW!

Fear of calculation to scale has inbred their ambitions into irrational & infinite lunacy.

Origin of such peculiar character manifest from infestation of jewish works into academia.

EW-kind neither created nor understood the sophisticate concepts used to preach
Yet their misinterpretation serves aims of encoding truth into dogma.

Those who corrupt INTO membership of the jew-sect
Have been persecuted by every logical civilization.

Logic & reason are the arch-enemies of jewish-scheming
Jews **XOR** Mathematics - mutually exclusive.

Germany exterminated jews till there was no trace left of conspiracy-sect.
Jews eradicated all mathematics till there was no trace left of that science.

'Jews as a blood borne race
'Were bred out of existence

'Due to Scheme of Many Colors
'Joseph the jew Conspiracy

'Tyrannic control of all grain
'In state of cyclic flood famine

'Only exchange equal weight
'Gold for grain

'ELSE DIE

'Thus extract all regional gold

'Those who had no gold
'DIED

'Pharaoh baited jew by greed
'Jew poster boy & all kind
'Condemned to slavery

'Total control under hands

'Each who had lost dear
'Under jewish conniving

'Jews were thus bred out
'Exterminated by melting pot
'Jew mixed with all abhorrent
'Inhumane, malformed, despicable
'Creatures found for sport of Justice

—

'Moses proclaimed his people
'Product of Egyptian Malicious Magic

'Were a people whose baseness
'Fell below that of savage animals

—

'Jewish evil schemes survived

'Called all treacherous of heart
'Take up PRACTICE and CLAIM lineage

'Not as a lost blood-line
'But as familiar in corruption of morales

'Sect gained great power

'Until they massacred Rome's legions
'Which had long protected them from enemies

'Rome in retribution
'Exterminated the entire sect
'By blood, by creed , by region

'Only left the remainder spy-kind
'Name-changers half-born abominations

'No priest to guide
'Never practiced religion

'Sleeper traitor agent
'Educated only in Rites of Subterfuge

—

'Corruption is a cycle borne from human nature
'When society does not purge out evil cultivation

'Irrefutable Intellect of Germany
'Constructed by three centuries
'Mathematic global dominion

'Calculated proof:
'Sect who adhere to Jewish ways
'Mutually exclusive
'To society based upon logic of sound thought

'Yet instead of extermination
'They scattered the EVIL seed

'Till the entire globe corrupted
'Submerged the lone temple of Virtue

OH MY VOLUPTUOUS LUMPS!

# 6 KRISILOGIA

**Krisilogia Theory**

'The spirit of liberty
'Is the spirit which is **not too sure** that it is right

'The spirit of liberty
'Is the spirit which **seeks to understand** the minds of other men & women

'The spirit of liberty
'Is the spirit which **weighs their interest alongside its own** without bias

'The spirit of liberty remembers
'That *not even a sparrow falls to earth unheeded*

'That there may be a kingdom
'Where the *least* shall be **heard and considered** side-by-side with the *greatest*

❧ Judge Learned Hand

Krisilogia, by **structured confrontation**, seeks to understand the unfamiliar & chaotic:
Resemblance of what is secure via Isologia ADJOINED to what is insecure in Quarry
Resemblance quantified by measure of divergence classifies nature of Quarry Space.

Result are not solutions, but attributes which reason compiles into argument:
{ unique characteristics, general identity, and eccentricity of noncomesaurable }

Matter of the investigation is to seek **what can be known**
From what Arithmetic can NOT qualify nor can Isologia identify.

✦

Monstrous observations of the universe which have indisputable mechanics
Yet whose esoteric nature elude mathematic command.

Often monsters are declared tame & draped as innocent
Unleashed to feed upon sound reason of the young
Excrement dull senses empower institutional control.

You should be afraid
But you are armed in full command of simple instruments
You must dive headfirst into that dragon's den
Victory or MADDness!

✦

Faith that glory of the deeper mechanisms is cast only in minute details
That panorama of the universe of arithmetic will prove - kinship of **eccentric unto familiar**.

Hope to uncover a basis thread uniting disassociate concepts
What learned case-wise shall be encountered again in a lifetime's devotion.

'World of Warcraft
'Server 99% Horde

'Seent disrespect AFK raid entrance
'Disillusioned 1% unable to contest

—

'Gnomly - Only gnomes gang
'Only in the Eastern Plaguealnds
'Infesting those northern woods

'Formed by HATRED of
'UrWifeMyKid Gnomelock

'Gnomes in the brushwoods
'Struck terror of fright
'Unto hundreds of strong
—

'Raid leader Healer AFK outside
'Surrounded by none-able-help

'Buffed up as only a coward can
'Log in then off casual filth

'Fight futile already dead

'Raid Tank came for vengeance
'Buffed up as only a coward can

'Raid told him not to fight
'To ask for help not go solo

'Sure in gear as in skill
'Took no heed

'I jumped my lil booty into a small forest bush
'Elite homie gnome warrior jumped out the same
'Arrival perfect timing to bait easy execution

'No raid this week fithly whores
—

'Next week solo hunt
'Finding no quarry

'Horde travelled by groups of 10
'From the chapel to entrance

'In a respect I aint never seen
'Aun on a 99% Alliance Server

'The smallest & insignificant
'Can only attain respect
'By claiming it full commitment

~~~ Khlamidia - Executus Conqueror of Ogrimar

Krisilogia is the structure which evolves into Isologia
Isologia is then able to qualify for Arithmetic.

Many studies have been insurmountable in the history of Mathematics until a change
New evolutions of the minds of men, unique perspective of individual, need of resolution.

True conquest of adventure for mathUR is wrangle'N a mustang into Krisilogia
Not to break bestial-nature fundamental to the being into a dog
Only to understand & coexist as one does in service of a kitty.

'First you learn the instrument
'Then you learn the music
'Then you forget all that and just PLAY

~~~ Charlie Parker

Bold of mind, steel in resolve, humble of heart
Every bushwack-blaze a valuable path IF record accessible
Clearly framed journey respected into gallery:
{ failures, patchwork, crusades, lost meander }

Arithmetic requires mechanism to proceed perfect
Isologia require a proof to verify identity
Krisilogia demands a capable transmission of reason
Perspective-driven case-study independent of right|wrong.

Krisilogia demands command of Arithmetic, Isologia, Logic
Most importantly synthesis, fused by fearless commitment, into well-composed argument.

Arithmetic must be in full command mechanical as the tool for micro/macro scope
Isologia must perceive immediate resolution of identity aun in strange distortion
Krisilogia is the masterful stage of wizardry to transmute the universe mathematic!

'Minecraft Adventure simulation

'Given a mechanical ability
'Compress homogenized atoms

'What will you do?

'Express your godhood
'By proof construction

'100,000 blocks solo-build
'Each four directions
'Gold powered rail
'Portal every 250 blocks

Ice King of the Nether Transit System

Non-quantifiable extra-mathematic entities have NO intrinsic order
Once bound to exist between Arithmetic bounds [ L.B. , U.B. ]
Non-quantifiable attains a bounded-tolerance Hood
Arithmetic Denomination is able to evolve Hood into order.

Axiom of Krisilogia:
Arithmetic numbers [ L.B. , U.B. ] will enclose a space into a specific partition.

Endpoints partition space into sections
Interior points of a section are judiciously selected to represent the specific partition
Such interior points are TESTED for properties specific to the given function
IF a partition is confirmed to be known-excluded
THEN working-set is refined to approach ultimate inclusion-set.

Limit of what can be done will seldom produce a pointwise result required by Isologia
Yet maximization of efforts to this limit - will produce a distinct IMAGE of inclusion-set.
✦
Quantitative Methods of Krisilogia:

Partitions - sculpt out known-exclusion from working-set
Establish a general structure by study of resolved inclusion-set

Peerage - Comparison to similar Functions to construct a bounded Nest
Select suitable peers from familiar foundational functions
From this set, select two extreme outliers to establish a spectrum:
More stable function < Quarry < Less stable function
Assess effects of Isologia's distributive manipulation upon this structure.

Self - Identify critical partitions to be refined
Fine tune inclusion-set at intelligent zones to attain sharp resolution.

Ideal - perturbation warp of a known function, conveniently ideal to manipulate
Attempt to manipulate this Ideal into the IMAGE of Quarry working-set.
Study the nature of manipulators and also distinction against Quarry.

'Inequalities demand so much mathematical sophistication of its readers
'As to be unsuited for nearly all our undergraduate mathematic students

'Mathematicians know that mathematical Analysis
'Is largely a systematic study & exploitation of inequalities

'Mathematic analysis itself
'Is devoted to finding judicious approximations for
'Integrals, infinite sums, solutions of differential equations, etc
'Without which conclusions could not be reached and theorems proved

Kazarinoff

Notation is essential to economize chains of thought
IF notation nests structure into an icon
THEN notation hides what need be explicit for readership
THEN icon is operated on as an element - when it is truly a structure!

Nested-process is proven when the decomposition of notation is non-atomic.
✦
Absolute Value is a algorithmic process of QUADRATIC operations
|| encodes a quadratic function which is a nested-process.

Absolute Value notation is to be AVOIDED at all costs
IF the notation can not be expanded into explicit Arithmetic operations
THEN it is proof that the symbol is extra-mathematic.
✦
Example of a Simple-process
Notation: a < b < c
Explicit: a < b AND b < c
✦
Abstractionist have fallen into the trap of nested-process notation
Due to the weakness of their minds to expand the process explicit.

The Fundamental Formula of Modern Analysis is entirely NON-MATHEMATIC!
Proof of the modern moron intellectual-poser.

The Fundamental Formula of Modern Analysis:

FOR **delta** [sought tolerance of input] which results in a **epsilon** [target tolerance of output]:
FOR ALL 'U' which satisfies
[x - **delta**] < U < [x + **delta**]
THEN
[FN(U) - **epsilon**] < A < [FN(U) + **epsilon**]
EXPLICIT
FN([x - **delta**] < U < [x + **delta**]) - **epsilon** < A < FN([x - **delta**] < U < [x + **delta**]) + **epsilon**
RESULT
This statement has no mathematic operational expansion
Procedure is nested then expressed as an icon, whose icon is operated on as an element

Mathematics is the element result of elements operated upon.

Nested structure is a logical algorithm
Whose results are case-wise and non-mathematic
Algorithm produces possibilities which require reason, then reconstitution.

Manipulation of Delta will effect Epsilon
Manner unique to each function
Often non-uniform within an Arithmetic Space
Complexity increased by character of Application Space.

Algorithm is a extra-mathematic procedure of reason
Which can not attain the closure of formulation demanded by mathematics.
✦
The Foundational Formula of Modern Analysis is non-mathematics
Dressed in Mathematic symbols.

Cute mathematic dress does not make a formula Mathematic!

All who PROFANE *mini-skirt* with hanging-balls, a total *faggit*

Thou shalt lift stones against such in the name of Darwinian Intellectual Evolution.

Total blindness of common sense - entirely captures nature of Abstractionist Absurdity.

Too cowardly to stand front a mirror to check bulge
Will always remain too ugly.

'Closure is the union of the set and all limit points

❧ Boas
FAIL!

All approach in Systapeiron relies on Krisilogia theory.
Convergence is the endless approach of partitions bounded by Arithmetic end-points.

Distance of Convergence is the spatial zone determined by the distance of end-points.
✦
Krisilogia
A < C; D < E; A + D < C + E

A < C; C < D; A < D
A < C; –C < –A; 1/C < 1/A -1/A < -1/C

✦

Distance of Convergence.

**A** is bound between (L.B.) & (U.B.)
L.B. < **A** < U.B. = [ L.B. , U.B. ]

Distance of convergent partition is the tolerance = U.B. - L.B.

**A** (approximation) must be within Distance of Convergence (tolerance).

✦

Ultimate test of maturity is to know at what pressure to apply methods
Such that the relation remains strong between the known bound and Quarry
Jurisprudence to only confirm results which are indisputable.

Judgements are highly subjective and two masters will seldom agree
Calculations & application of theory allow another to follow
Explicit weights of choices which produced a conclusion must be clear.

✦

Krisilogia ultimate ability is the systematic mastery of error: quantification & bounding.
Precise convergent control of uncertainty within the master's framework.

'There is no such thing as an infinitely large n (iteration)

❧❧❧ Knopp

✦

Partitions demand Arithmetic Space.

Sanity of an expression is lost once indeterminates become nested into structure
Via assignment of an indeterminate as an end-point.

All uncertainty must exist interior to partition.

Uncertainty of bounds which describe uncertainty
Exists without any certainty.

**Procedural Container of Arithmetic Space: Systapeiron Programming**

Layers of a Mathematician's Operational Space:

{ Observed Universe Space ➡ Universal Number Space ➡ Arithmetic Space }

Arithmetic operates space-wise by the operations upon a denomination.

Systapeiron operates interval-wise by judicious methods

Elements of UNS are homonogenized into Arithmetic

Homo elements are entirely Arithmetic, yet are distinct in the origin of creation:

Natural Arithmetic is the consequence of operations on a space

Systapeiron is an assignment returned by techniques.

Systapeiron is the bridge between UNS & Arithmetic.
Abstract quantity is sanctified in preparation for baptism into homogenity.

Forge of abstractions into a hardened quantity capable of mathematical magnitude.

✦

Functions which demand a change of denomination in traversal FAIL as Arithmetic.

Systapeiron catches the Arithmetic arrest of calculation

Systapeiron seeks to understand the nature of the FAIL

Apply methods in order to return a HOMO element

Arithmetic accepts the arithmetic element and proceeds its traversal.

✦

Always NEED exist discrimination between sources within Arithmetic Space.

Native Arithmetic begat from traversal

AGAINST illegitimate bastard hewn into magnitude by **Systapeiron**.

Magnitude sourced from traversal in Arithmetic Space has the quality of perfection.

Quantity assigned into Arithmetic Space by Systapeiron is an element non-atomic to the function.

✦

Arithmetic traversal has 3 fates:

Return a populated space

Return a partial space which does not contain numbers of failure

Default to Systapeiron which returns 2 Arithmetic Spaces: Natural & Systapeiron

Failure

Natural is the basis given by denomination & function.
Exist various Systapeiron spaces, one may be merged to Natural space.

Natural Space is invariant.
Systapeiron Space is situationally chosen among various options.

✦

Arithmetic Space = 1/(10^3)

9/(10^3) + 1/(10^1)

Requires a common denomination
9/(10^3) + 100/(10^3) = 109/(10^3)

109/1000 requires the minimum Arithmetic Denomination of 10^3.
✦
Hypotenuse of the unit square of geometry is the foremost irrational of mathematics.

Systapeiron bounds the square-root-of-two by
Arithmetic Magnitudes: 1414/(10^3) < X < 1415/(10^3)

Quantity fathered from Systapeiron must be marked & branded into segregation.

Nested refinement of Arithmetic Lattices ARE NOT EQUIVALENT to Systapeiron quantities.

[ L.B. , U.B ] of the square root of 2:
[ 1414/(10^3) , 1415/(10^3) ]

Systapeiron CAN NOT progress in denominational refinements.
Bounds built in 10^3 Denomination
When progressed to the next denomination may break Systapeiron Nest:
14140/(10^4) 14150/(10^4)
FAIL!
Systapeiron quantities require Systapeiron methods to approach refinement.

**1414**/(10^3) ➡ glb.NEST_4(sqrt[2]) = **14142**/(10^4)

**1415**/(10^3) ➡ lub.NEST_4(sqrt[2]) = **14143**/(10^4)

Denominational refinement of the Arithmetic Denomination
{ 1111/1000 ➡ 11110/10000 }

Systapeiron uses Cantor Nests to achieve denominational refinement
**1414/1000 ➡ 14142/10000**
**1415/1000 ➡ 14143/10000**
✦
Arithmetic effectuates by operation.

Systapeiron effectuates by algorithmic procedures
Coded programming manage natural quantities and homos
Output generates the Lattice.

Function operation fails perfection upon a denomination
Specific signal is sent to Systapeiron
Systapeiron handles signal with a specific procedure
Procedures return a Homo OR Fail
Fail sends an fault error execution-termination.

Systapeiron retains the segregation of naturals from homos
Returned quantity of Systapeiron is an entirely perfect Arithmetic quantity
Yet such quantity is not a result of the function.

Systapeiron **{** Code [ libraries ] ( Arithmetic ) **}** ➡ Lattice Output.

'the Cavern'D Man

'THROE one he breathes the air
'THROE one he hears music of the spheres

'THROE one the eternal vine FLOURISHES
'That HE may produce grapes!

'THORE one can look
'See small portions of the eternal world
'That EVER GROWETH

'THROE one himself pass out what TIME he please
'But he will NOT

'For stolen JOYS are sweet
'Bread eaten in secret PLEASANT

'So sang a Fairy mocking
'As he sat on a streaked Tulip
'ThinkN none saw him

'When he ceased

'I STARTED!

'FROM THE TREES!

'Caught him in my hat
'As boys knock down a butterfly

'How know you this?
'Said I
'Small Sir
'Where did you learn this song?

'Seeing himself in my possession
'Thus he answered me

'My Master

'I am Yours

'COMMAND ME

'For I must obey

'Then Tell me
'What is the Material World?
'Is it dead?

'He laughN answered

'I will write a book on

'Leaves of Flowers

'IF you feed me on

'LOVE THOUGHTS

'& give me now and then

'A cup of SPARKLING poetic FANCIES

'So when I am tipsie

'I sing for you

'To this soft lute

'And shew you ALL ALIVE

'The world

# 'When every particle of dust breathes forth its JOY

'I took him home
'In my warm bosom

'As we went along
'Wild flowers I gathered

'He shewD me each eternal flower

'He laughed aloud to see them
'Whimper because they were pluckT

'They hover round me like a cloud of incense

'When I came into my parlour & sat down
'Took my pen to write

'My Fairy sat upon the table
'And dictated

❧❧ Blake

'Faye departed this world
'When Sherlock took a stand

~This photograph
~INDISPUTABLE in conclusion
~Faries are mongst us!

'His naive honor
'Paired with irrefutable induction

'Dashed away any hope
'Faye king able stay

'Till a new age

'Until FANCY surpass reality

'Artificial Fabrication
'Usher forth faye
'From foreign shores

'Return homestead DOMINION
